How to order when combining two specifications: simple specials (XA \Box) and made-to-order common specifications (XB \Box , XC \Box).

How to Order Example: 1 (Enter the symbol in alphabetical order.)

Made to Order Common Specifications: -XB5: Oversized Rod Cylinder

1 Oversized Rod Cylinder

A cylinder that has been made stronger through the use of a piston rod with a larger diameter. It is used for long stroke applications that pose the risk of bending or buckling of the piston rod.

(Please contact SMC if a lateral load must be applied to it.)

Heat resistant cylinder

Specifications

| Ambient temperature range | -10 to 150°C (0 to 150°C for CS1, CS2 series) |
|---|---|
| Seals materials | Fluororubber |
| Grease | Heat resistant grease |
| Specifications other than above and external dimensions | Same as standard type |

A Warning Precautions

Be aware that smoking cigarettes, etc. after your hands have come into contact with the grease used in this cylinder can create a gas that is hazardous to humans.

- Note 1) Operate without lubrication from a pneumatic system lubricator.
- Note 2) Please contact SMC for details on the maintenance intervals for this cylinder, which differ from those of the standard cylinder. Note 3) In principle, it is impossible to make built-in magnet type
- and the one with auto switch. But, as for the one with auto switch, and the heat resistant cylinder with heat resistant auto switch, since it will be differed depending on the series, please contact SMC.
- Note 4) Pisto speed is ranged from 50 to 500 mm/s. But, for MGQ⊡80, 100 and MGP⊡80, 100, it will be 50 to 400 mm/s. 50 to 200 mm/s for the MK series.
- The piston speed for the CY3B series is 50 to 400 mm/s. Note 5) Please contact SMC for the CQ2, CQS, MGP and MGQ series with rubber bumper.
- Note 6) As for the ambient temperature range of the CY3B series, since Note 7) The ambient competance targe of the 30 ab 20 ab 2
- - details of the packing set for CJP2 6,10 and 16.

How to Order

Standard model no.

». – ХВ9

Low speed cylinder •

Specifications

| Piston speed | 10 to 50 mm/s (CY is ranged between 15 to 50 mm/s.) |
|---------------------------|---|
| Dimensions | Same as standard type |
| Additional specifications | Same as standard type |

∆Warning Precautions

Be aware that smoking cigarettes, etc. after your hands have come into contact with the grease used in this cylinder can create a gas that is hazardous to humans.

-XB10

Made to Order

5 Intermediate Stroke (Using exclusive body)

Cylinder which can reduce the mounting space by using an exclusive body which does not use a spacer to achieve that the full length dimension could be shortened when an intermediate stroke other than the standard stroke is required.

Applicable Series

| Series | Description | Model | Action | Note | Vol. no. (for std model) |
|--------|----------------------------|----------|-------------------------------|--------------------------------|--------------------------|

MGQL (Ball bushing bearing) A, E Dimensions

* Dimensions except mentioned above are the same as standard type.

Made to Order Common Specifications: -XB10A: Intermediate Stroke (Spacer-installed type)

6 Intermediate Stroke (Spacer-installed type)

A spacer is installed on the exclusive body (\bullet indication). The overall length is shorter than that of the spacer-installed type 1. The \bigcirc indicates the selectable stroke range. (Strokes with the \bullet indication are not selectable.) The — indicates strokes supported by the spacer-installed type 1.

| Bore size [mm] | Stroke range | | Stroke | | | | | | | | | | | | | | | | |

Specifications

| Ambient and fluid temperature range | 0 to 150°C |
|--------------------------------------|-------------------------------------|
| Seal material | Fluororubber |
| Grease | Heat-resistant grease |
| Min. stroke for auto switch mounting | 15 (Same for both 1 pc. and 2 pcs.) |
| Specifications other than the above | Same as the standard type |

For the detailed specifications of auto switches, refer to pages 1346 and 1347.

Auto Switch Proper Mounting Position (Detection at stroke end) and Mounting Height

 Adjust the auto switch after confirming the operating conditions in the actual setting.

* The dimensions of the cylinder body are equivalent to those of the standard type, double acting, single rod of the CDQ2 series.

* Auto switches are shipped in the same package as the product but do not come assembled for protection purposes.

Assemble them by referring to the A and B dimensions for mounting position shown above

* The tightening torque for the auto switch mounting M2.5 screw is 0.25 to 0.35 N·m.

11 High Speed Type

This is a high speed type of the dual rod cylinder CXS series.

The cylinder speed can reach a maximum of 1500 mm/s (1000 mm/s for ø25 and ø32) by enlarging the orifice diameter of the cylinder port. The allowable kinetic energy is approximately four times that of the standard type.

adjustment bol

Adjustment bolt

16

25

40

1. Loosen the lock nut for the adjustment bolt and adjust a stroke by rotating the adjustment bolt.

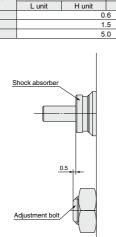

After adjusting the stroke, secure the adjustment bolt by tightening the lock nut.

12 Stroke Adjustment Unit with Adjustment Bolt

If the effective stroke of the shock absorber is shortened by the stroke adjustment, its absorption capacity will be drastically reduced. Therefore, the adjustment bolt should be secured at a position where it projects about 0.5 mm farther than the shock absorber.

XB20 (Stroke Adjustment Unit with Adjustment Bolt)

Tighten shock absorber holding bolts equally with the specified tightening torque.

Maximum Impact Weight Graph (Shock Absorber Performance Line Graph)

Ensure that the impact mass and the impact speed are within the absorbed energy graphs below. Refer to each cylinder selection calculation for load factors and guide load factors.

Please consult with SMC for the MY3 series since there are restrictions on collision speed resulting from the cylinder.

| Stroke adjustment range [mm] | 0 to | 0 to -15 | | -25 | 0 to -30 |

Mounting

Do not allow hands or fingers near the cylinder during its operation.

If finger, etc. were to get caught between shock absorber and body, it might damage on the human body and the peripheral equipment. Take protective measures by mounting a protective cover, etc. as necessary.

Basically, avoid bottom-mounting a cylinder.

Mounting space is limited owing to the guide rod and the end plate, etc. Mount a cylinder by the top mounting or side mounting.

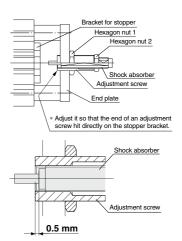

Adjustment

1. How to adjust an adjustment screw (Stroke adjustment)

Loosen only the hexagon nut 1, then turn the adjustment screw to adjust the stroke. After adjusting, lock it with the hexagon nut 1. Fix it at the position ejected from the end plate, so that the end face of an adjustment screw could hit the bracket for stopper directly. (Refer to the figure right above.)

2. How to replace shock absorbers

Loosen hexagon nut 2, and turn a shock absorber counterclockwise for removal. For installing a new shock absorber, fix it at the position that the end face of an adjustment screw sticks out by 0.5 mm from a shock absorber. (Refer to the figure on the right.) After adjusting the position of shock absorber, be sure to secure with hexagon nut 2.

Made to Order Common Specifications: -XC2(A): Rod End Length Extended 10 mm

14 Rod End Length Extended 10 mm

-XC2 Rod end length (L dimension) specifications of the cylinder for mounting the flange on the foot or rod side are "standard product + 10 mm" (-XC2).

How to Order

Change of port location

Specifications: Same as standard type

The port location of a standard product is in the axial direction, and it is shipped as plugged on both sides. However, side ported types can be ordered. A shifting of the plugs is not required by the customer.

@SMC

Made to Order Common Specifications: -XC4: With Heavy Duty Scraper

16 With Heavy Duty Scraper

Symbol

lade 1

Orde

Cylinders with a heavy duty scraper on the wiper ring are suitable for use in extremely dusty environments and those where they will be exposed to earth or sand, such as in die-casted equipment, construction machinery, and industrial vehicles.

* CA2DH (Air-hydro type) comes with a heavy duty scraper as standard.

How to Order

Specifications: Same as standard type

Do not replace heavy duty scrapers.

 Since heavy duty scrapers are press-fit, do not replace the cover only, but rather the entire rod cover assembly.

The CM2 series cannot replace either heavy duty scraper or rod seal. It goes for replacing retainer assembly for the CS1 series.

Replace the CNA2 series with the lock unit.

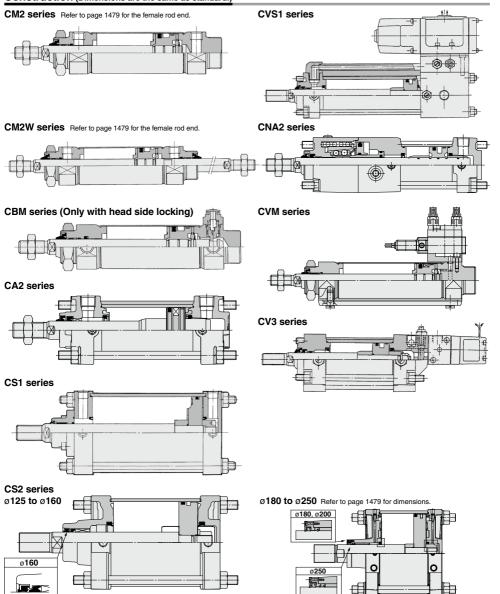

For CS2 series bore sizes ø125 to ø160, the entire rod cover assembly will need to be replaced. For bore sizes ø180 to ø250, a special tool is required for replacement, and therefore the product will need to be sent in for factory repair.

Symbol

Made to Order

17 Heat Resistant Cylinder (-10 to 110°C)

Cylinder which changed the seal material for heat resistance (up to 110°C) in order to use under the severe ambient temperature condition which exceeds the standard specifications of -10 to 70°C (0 to 70°C for CS1, CS2 series).

Specifications

| Ambient temperature range | -10 to 110°C (0 to 110°C for CS1, CS2 series) | | | | |
|--|--|--|--|--|--|
| Seal material | Fluororubber (In the case of CS1 cylinder, cushion seal is made of NBR.) | | | | |
| With auto switch | Unavailable (2) | | | | |
| Specifications other than above and external dimensions | Same as standard type | | | | |

- Note 1) Please contact SMC for details on the maintenance intervals for this cylinder, which differ from those of the standard cylinder.
- Note 2) Manufacturing built-in magnet type and the one with auto switch is impossible.
- Note 3) Material of rod boot is heat resistant tarpaulin.
- Note 4) Applicable bore size of the CS1 series Lube type: ø125 to ø300 Non-lube type: ø125 to ø200

18 Made of Stainless Steel

The piston rod and rod end nut (male thread only) of this model are made of stainless steel. This model is suitable for applications in which the end of the piston rod is to be immersed in water, etc., and there is concern regarding the generation of rust or corrosion.

Note 2) There is a maximum stroke limit for CA2, MB, MB1 and CS1 cylinders.

Note 3) The MB-Z, MB1-Z, and CA2-Z made of stainless steel are applicable as "-XC68".

Note 4) Only available for ø125 type.

Note 5) Keep in mind that poor lubrication of the piston rod sliding surface may result in the specifications stated in the catalog not being satisfied.

Note 6) Double end lock is available as a special order.

| Maximum Stroke |) | (mm) |
|----------------|---------------------------|--|
| Series | Double acting, Single rod | Double acting single rod with rod boot |
| CA2, MB, MB1 | CA2: 1500 MB·MB1: 1700 | 1000 |

Precautions

A Warning

- When the cylinder is operating, if something gets caught between the stopper bracket for adjusting the stroke and the cylinder body, it could cause bodily injury or damage the peripheral equipment. Therefore, take preventive measures as necessary, such as installing a protective cover.
- 2. To adjust the stroke, make sure to secure the wrench flats of the stopper bracket by a wrench, etc. before loosening the lock nut. If the lock nut is loosened without securing the stopper bracket, be aware that the area that joins the load to the piston rod or the area in which the piston rod is joined with the load side and the stopper bracket side could loosen first. It may cause an accident or malfunction.

Precautions

∧Caution

- When air is supplied to the cylinder, if the stroke adjustment bolt is loosened in excess of the allowable stroke adjustment amount, be aware that the stroke adjustment bolt could fly out or air could be discharged, which could injure personnel or damage the peripheral equipment.
- Adjust the stroke when the cylinder is not pressurized.
 If it is adjusted in the pressurized state, the seal of the adjustment section could become deformed, leading to air leakage.

Made to Order

22 Dual Stroke Cylinder/Double Rod Type

Two cylinders are constructed as one cylinder in a back-to-back configuration allowing the cylinder stroke to be controlled in three steps.

Made to Order

23 Dual Stroke Cylinder/Single Rod Type

Two cylinders can be integrated by connecting them in line, and the cylinder stroke can be controlled in two stages in both directions. Do not operate the CS1 series at twice the output.

23 Dual Stroke Cylinder/Single Rod Type

Specifications: The following models are the same as the standard type except for the specifications listed below.

(Please contact SMC for each manufacturable stroke length.)

CJ2

| Bore size (mm) | | 10 | 16 | | | |
|--------------------------|----------------------------|---|---------|--|--|--|
| Piston speed | | The piston speed for the stroke B retraction side is 50 to 500 mm/s | | | | |
| Allowable kinetic energy | Stroke B (Retraction side) | 0.015 J | 0.040 J | | | |
| Stroke tolerance | | Stroke A: 0 to +2.0 mm, Stroke B is the same as that of the standard type | | | | |
| Specifications other | than above | Same as standard type | | | | |

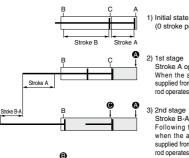

| - | | | | | | | | |
|--------------------------|--|--|--------|--------|--------|--|--|--|
| Bore size (mm) | 20 | 25 | 32 | 40 | | | | |
| Piston speed | The piston speed for the stroke B retraction side is 50 to 500 mm/s. | | | | | | | |
| Allowable kinetic energy | Stroke B (Retraction side) | 0.12 J | 0.18 J | 0.28 J | 0.53 J | | | |
| Stroke tolerance | | Stroke A: 0 to +2.0 mm, Stroke B is the same as that of the standard type. | | | | | | |
| Specifications other | han above Same as standard type | | | | | | | |

| Bore size (mm) | 20 | 25 | 32 | 40 | 50 | 63 |
|---|---|-------|--------|-------|-------|-----------|
| Piston speed | ston speed The piston speed for the stroke B retraction side is | | | | | 500 mm/s. |
| Allowable kinetic energy Stroke B (Retraction side) | 0.07 J | 0.1 J | 0.16 J | 0.3 J | 0.5 J | 0.85 J |
| Specifications other than above | Same as standard type | | | | | |

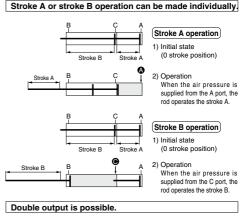

(0 stroke position)

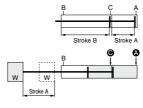

- 3) 2nd stage Stroke B-A operation Following the 1st stage, when the air pressure is supplied from the C port, the rod operates the stroke B-A.
- 4) Cylinder retraction When the air pressure is supplied from the B port, the rod retracts completely.

∧Caution

- 1. Do not supply air until the cylinder is fixed with the attached bolt.
- 2. If air is supplied without securing the cylinder, the cylinder could lurch, posing the risk of bodily injury or damage to the peripheral equipment.

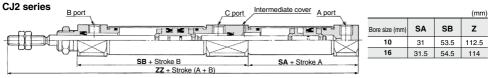

- 1) Initial state (0 stroke position)
- 2) Double output When the air pressure is supplied to the A and C ports at the same time, the double output can be obtained in the stroke A range.

23 Dual Stroke Cylinder/Single Rod Type

Made to Order

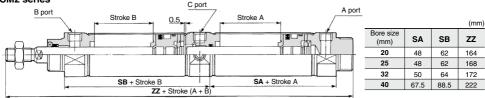

Dimensions (Dimensions other than below are the same as standard type.)

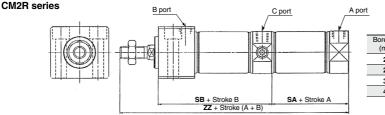

Note) When mounting an auto switch at the extended piston rod A side, the following auto switches interfere with the intermediate cover. In this case, please mount on the stroke B side. Please be aware that the auto switch defects and temporarily turns ON/OFF when passing the intermediate position of the B stroke. Solid state auto switch : D-H7□, D-H7C, D-H7□W, D-H7NF, D-H7BA

Reed auto switch : D-C7□, D-C80, D-C73C, D-C80C, D-A80, D-A9□, D-A9□V, D-A79W, D-A73

Precautions

▲Caution

- 1. Remove the temporary fixing nut and flat washer from the mounting bolt, and secure the cylinder properly with the mounting bolt.
- 2. Although the cylinder can be detached by removing the nut, do not detach it for purposes other than replacing the seal.
- 3. The removed nut and flat washer are not used to secure the body.

25 Auto Switch Rail Mounting Type

A cylinder on which a rail is mounted to enable auto switches, in addition to the standard method for mounting auto switches (Band mounting type).

Applicable Series

| Series | Description | Model | Action | Note | Vol. no. (for std model) |
|--------|-------------------------------------|----------|--------------------------------------|--------------------------|--------------------------|
| | | CM2-Z | Double acting, Single rod | | |
| | Air cylinder | GIVIZ-Z | Single acting (Spring return/extend) | | |
| | | CM2W-Z | Double acting, Double rod | | |
| | | CM2K-Z | Double acting, Single rod | | |
| CM2 | Non-rotating rod type | GIVIZK-Z | Single acting (Spring return/extend) | | |
| CIVIZ | | CM2KW | Double acting, Double rod | | |
| | Direct mount type | CM2R-Z | Double acting, Single rod | | |
| | Non-rotating rod, Direct mount type | CM2RK-Z | Double acting, Single rod | | |
| | Smooth cylinder | CM2Y-Z | Double acting, Single rod | | Web Catalog |
| | End lock cylinder | CBM2 | Double acting, Single rod | For XC13A and XC13C only | |
| | Air cylinder | CG1-Z | Double acting, Single rod | Except the trunnion type | |
| | Double rod type | CG1W-Z | Double acting, Double rod | Except the trunnion type | |
| CG1 | Non-rotating rod type | CG1K-Z | Double acting, Single rod | Except the trunnion type | |
| | Direct mount type | CG1R-Z | Double acting, Single rod | Except with air cushion | |
| | End lock cylinder | CBG1 | Double acting, Single rod | For XC13A only | |
| MGG | Guide cylinder | MGG | Double acting | | |
| MGC | Guide cylinder | MGC | Double acting | | |

| D-A7□/A80 D-A7□H/A80H D-A73C/A80C | 5 | 10 | 15 + 10 (n-2) ^{Note)} (n=4, 6…) | | | | | | |
| D-A7⊟H D-A80H | 5 | 10 | 15 + 15 (n–2) ^{Note)} (n=4, 6···) | | | | | | |

Operating range

(mm) Auto Switch Mounting Height

| | | | | (mm) |
|---|-----|----------|--------|------|
| Auto autitale availat | E | Bore siz | ze (mm | 1) |
| Auto switch model | 20 | 25 | 32 | 40 |
| D-F7□/F79F/F7□V D-J79/J79C D-F7□W/J79W/F7□WV D-F7BA/F7BAV D-F7NTL | 3.5 | 3.5 | 4 | 3.5 |
| D-A9□/D-A9□V | 5.5 | 6 | 6.5 | 6.5 |
| D-A7□/A80 D-A7□H/A80H D-A73C/A80C | 7.5 | 8 | 8.5 | 8.5 |
| D-A79W | 10 | 10.5 | 12.5 | 12.5 |

 Since the operating range is provided as a guideline including hysteresis, it cannot be guaranteed (assuming approximately ±30% dispersion). It may vary substantially depending on an ambient environment.

Note) When "n" is an odd number, an even number that is one larger than this odd number is used for the calculation. However, the minimum even number is 4. So, 4 is used for the calculation when "n" is 1 to 3.

Auto Switch Mounting Bracket: Part No.

| Auto switch model | Bore size (mm) | Note 1) When adding D-A9□(V), order a set of auto switch mounting brackets BQ-1 and BQ2-012 for |
|-------------------|----------------|---|
| | ø20 to ø40 | the CDQ2 series (ø12 to ø25) separately. When adding the auto switches other than D-A9□(V) mentioned on the left and D-F7BA(V). |
| D-A9□/A9□V | BQ2-012 | order auto switch between the second |

| 100 | 68.5 | 61.5 | 66 | 59 | 71 | 64 | 65.5 | 58.5 | 63 | 56 | 69 | 71 | 73 | 68.5 | 74.5 | 72 |

Note 1) Adjust the auto switch after confirming the operating conditions in the actual setting.

Note 2) For dimensions other than the proper auto switch mounting position and height, refer the standard type for MGG and MGC series.

Minimum Auto Switch Mounting Stroke/CDG1, MGG, MGC

| | | | (mm) |
|--|----|-------------------|---|
| Auto switch | | No. of auto s | witch mounted |
| model | 1 | 2 Same surface | n (n: No. of auto switches) Same surface |
| D-M9□/M9□V D-F7□V D-J79C | 5 | 5 | 10 + 10 (n-2) ^{Note)} (n=4, 6…) |
| D-M9□WV D-M9□AV D-F7□WV D-F7BAV D-A79W | 10 | 15 | 10 + 15 (n-2) ^{Note)} (n=4, 6…) |
| D-M9⊡W D-M9⊡A | 10 | 15 | 15 + 15 (n-2) ^{Note)} (n=4, 6…) |
| D-F7□ D-J79 | 5 | 5 | 15 + 15 (n-2) ^{Note)} (n=4, 6…) |
| D-F7□W/J79W D-F7BA D-F79F/F7NT | 10 | 15 | 15 + 20 (n-2) ^{Note)} (n=4, 6…) |
| D-A7□/A80 D-A7□H/A80H D-A73C/A80C | 5 | 10 | 15 + 10 (n-2) ^{Note)} (n=4, 6…) |
| D-A7⊟H D-A80H | 5 | 10 | 15 + 15 (n-2) ^{Note)} (n=4, 6…) |

Note) When "n" is an odd number, an even number that is one larger than this odd number is used for the calculation. However, the minimum even number is 4. So, 4 is used for the calculation when "n" is 1 to 3

Made to Order Common Specifications: -XC27: Double Clevis and Double Knuckle Joint Pins Made of Stainless Steel

34 Double Clevis and Double Knuckle Joint Pins Made of Stainless Steel

Symbol -XC27

Made to Order

To prevent the oscillating portion of the double clevis or the double knuckle joint from rusting, the material of the pin and the retaining ring has been changed to stainless steel.

Made to Order Common Specifications: -XC42: Built-in Shock Absorber in Head Cover Side

43 Built-in Shock Absorber in Head Cover Side

Symbol -XC42

A type of the CG1 series air cylinder in which a special shock absorber is enclosed in the head portion so that its ability to absorb energy during the retraction of the cylinder is considerably greater than the current air cushion.

Applicable Series

| Series | Description | Model | Action | Note | Vol. no. (for std model) |
|--------|---|-------|---------------------------|--|--------------------------|
| CG1 | G1 Air cylinder CG1-Z Double acting, Single rod | | Double acting, Single rod | Except head side trunnion and clevis types | Web Catalog |

How to Order

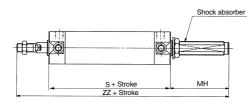

Specifications

| Piston speed | 50 to 1000 mm/s |
|---------------------------|-----------------------|
| Additional specifications | Same as standard type |

* On the axial foot and head side flange types, the bracket is mounted at the time Oof shipment. Others are shipped together (but not assembled).

Construction/Dimensions (Other dimensions are the same as CG1 long stroke cylinder.)

| | | | | | (mm) |
|-----------|--------------|----------------|-----|------|-------|
| Bore (mm) | Stroke range | Shock absorber | S | МН | ZZ |
| 20 | 10 to 350 | RBAC0806 | 77 | 23.5 | 135.5 |
| 25 | 10 to 400 | RBAC1007 | 77 | 31 | 148 |
| 32 | 15 to 450 | RBAC1412 | 79 | 55 | 174 |
| 40 | 15 to 800 | RBAC2015 | 87 | 62.5 | 199.5 |
| 50 | 15 to 1200 | RBAC2015 | 102 | 55.5 | 215.5 |
| 63 | 25 to 1200 | RBAC2725 | 102 | 92.5 | 252.5 |

* Shock absorbers are consumables.

The specifications for shock absorbers are the same as RBC□□□, but use RBAC□□□ when an external pressure is applied such as for a built-in cylinder.

The maximum absorption energy may decrease depending on the operating conditions.

The shock absorber service life is different from that of the CG1 cylinder. Refer to the RB series Specific Product Precautions for the replacement period.

Made to Order Common Specifications: -XC51: With Hose Nipple -XC52: Mounting Nut with Set Screw

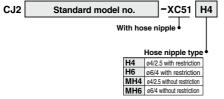

The one with hose nipple attached in order to save time for assembly at the time of shipment.

Made to Order Common Specifications: -XC57: Rodless Cylinder with Floating Joint

Note) The body of this cylinder is for connecting to the floating joint so that it cannot be connected to the body of the standard type. Therefore,

please contact SMC for this.

47 Rodless Cylinder with Floating Joint

A special floating joint has been added to the CY3B series, which reduces the amount of labor that is required for connecting the cylinder to the guide of another shaft (load side).

The bolts used for joining the floating joint to the load can be secured either from above or below. (CY1B with a ø6 or ø10 bore must be secured from above.)

Note 1) With dimension F*, the amount of clearance between the body and the floating joint is 1 mm. The self weight deflection of the cylinder tube is not taken into account. Before operating the cylinder, determine the proper value by taking the amount of self weight deflection and the amount of off-centering from the other shaft into consideration.

Note 2) When the bolts are secured from above, be aware that if the cylinder is operated when dimension R (on 96 and ø10, 3 mm or over) is exceeded, the end of the bolt could come in contact with the body, without being able to achieve the floating effect.

Note 1) With dimension FE, FF, and HB, the amount of clearance between the body and the floating joint is 1 mm. The self weight deflection of the cylinder tube is not taken into account. Before operating the cylinder, determine the proper value by taking the amount of self weight deflection and the amount of off-centering with the other shaft into consideration.

Note 2) When the bolts are secured from above, be aware that if the cylinder is operated when dimension R is exceeded, the end of the bolt could come in contact with the body, without being able to achieve the floating effect.

Made to Order Common Specifications: -XC65: Made of Stainless Steel (Combination of XC7 and XC68)

48 Made of Stainless Steel (Combination of XC7 and XC68)

Suitable for the cases it is likely to generate rust by being immersed in the water and corrosion.

| Stroke adjustment range (mm) | 0 to -25 | 0 to30 | | | | | | |
| Piston speed | Refer to the graph below. | | | | | | | |

| Soft type RJ series type (-XB22) is also |
|--|
| available. |
| For details, refer to -XB22. |

Allowable Kinetic Energy

Load mass and cylinder speed should be observed within the range given in the graph below.

Stroke extended side (Shock absorber)

The shock absorber service life is different from that of the MGP cylinder. Refer to the RB series Specific Product Precautions for the replacement period.

Symbol

-XC69

Mounting

Do not allow hands or fingers near the cylinder during its operation.

If finger, etc. were to get caught between shock absorber and body, it might damage on the human body and the peripheral equipment. Take protective measures by mounting a protective cover, etc. as necessary.

Basically, avoid bottom-mounting a cylinder.

Mounting space is limited owing to the guide rod and the end plate, etc. Mount a cylinder by the top mounting or side mounting.

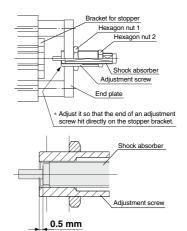

Adjustment

1. How to adjust an adjustment screw (Stroke adjustment)

Loosen only the hexagon nut 1, then turn the adjustment screw to adjust the stroke. After adjusting, lock it with the hexagon nut 1. Fix it at the position ejected from the end plate, so that the end face of an adjustment screw could hit the bracket for stopper directly. (Refer to the figure right above.)

2. How to replace shock absorbers

Loosen hexagon nut 2, and turn a shock absorber counterclockwise for removal. For installing a new shock absorber, fix it at the position that the end face of an adjustment screw sticks out by 0.5 mm from a shock absorber. (Refer to the figure on the right.) After adjusting the position of shock absorber, be sure to secure with hexagon nut 2.

-XC83

te) When the piston is locked, the load mass is limited by the mounting orientation and the operating pressure. For details about the lock specifications

etc., refer to the cylinders with lock (Web Catalog)

Non-rotating rod accuracy must be below the values shown in the table at the retraction of the cylinder (initial value), and without loads or the conditions excluding the deflection of the auide rods.

How to Order

Grease for food processing equipment

Specifications

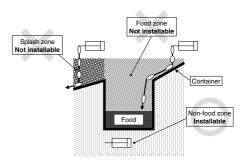

| Seal material | Nitrile rubber |
|---------------------------------|------------------------|
| Grease | Grease for food |
| Auto switch | Mountable |
| Dimensions | Same as standard model |
| Specifications other than above | Same as standard model |

Marning Precautions

Be aware that smoking cigarettes, etc. after your hands have come into contact with the grease used in this cylinder can create a gas that is hazardous to humans.

<Not installable>

| | An environment where food which will be sold as merchandize, |
|-----------------------------|--|
| | directly touches the cylinder's components. |
| | An environment where food which will not be sold as |
| | merchandize, directly touches the cylinder's components. |
| <installable></installable> | |
| Non-food zone | An environment where there is no contact with food. |

Note 1) Avoid using this product in the food zone. (Refer to the figure above.) Note 2) When the product is used in an area of liquid splash, or a water resistant function is required for the product, please consult SMC.

- Note 3) Operate without lubrication from a pneumatic system lubricator. Note 4) Use the following grease pack for the maintenance work.
- GR-H-010 (Grease pack for the maintenance work. GR-H-010 (Grease: 10 g) Note 5) Please contact SMC for details on the maintenance intervals for this

cylinder, which differ from those of the standard cylinder.

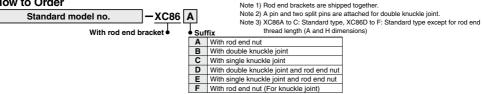

60 With Rod End Bracket

Piston rods are heat treated. Even when an external force exceeding the specification range acts temporarily on the piston rod in the locked state, it is resistant to damage and an unlocking failure is unlikely to occur.

Made to Order Common Specifications: -XC93 : With Greater Water Resistance + Stable Lubrication Function

Made to Order

66 With Greater Water Resistance + Stable Lubrication Function

Symbol -XC93

-5 times stronger against water (liquids) than the standard model

Equipped with the greater water resistant scraper (Fluororubber). The Lube-retainer creates grease coating around the piston rod, which improves lubrication.

Stainless steel can be selected for the piston rod and rod end nut.

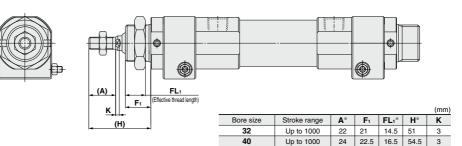

Applicable Series

*: Same as the standard model.

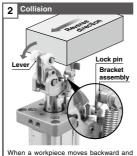

Made to Order Common Specifications -XC102: Lock Release Specification

67 Lock Release Specification

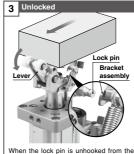

·Prevents lever damage when a transferred workpiece moves backward

(Prevents damage by releasing the locked lever when a pallet suddenly moves backward and collides with the lever)

collides with the lever, the lock pin unhooks from the bracket assembly as the lever is

bracket assembly, the lever becomes unlocked, which allows the workpiece to

pass through.

Symbol

-XC102

The lever is in the locked state when the lock pin is hooked on the bracket assembly.
