Fieldbus System

(Output device for driving 5-port solenoid valves)

* Only the SY and SV valves are UL-compliant.

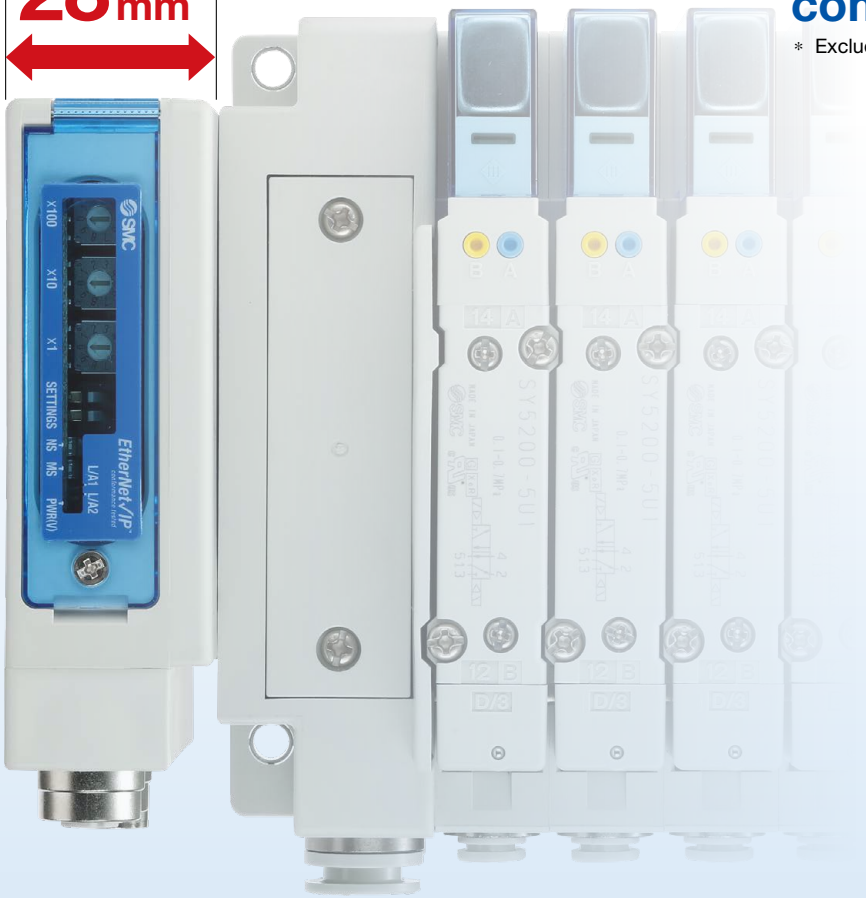
RoHS

Space-saving installation

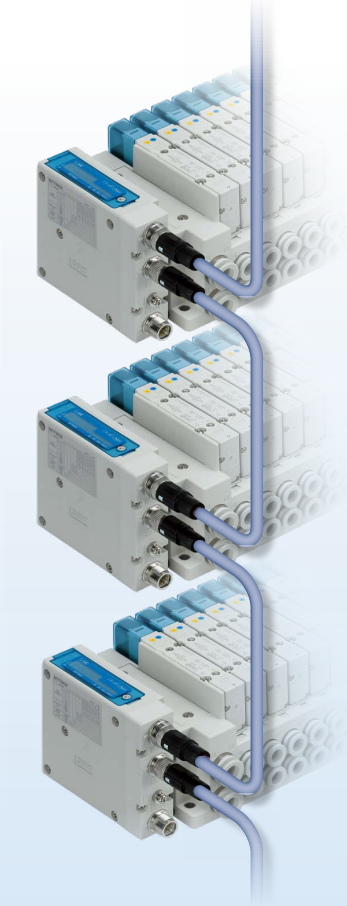
Compact

Approx. **28 mm**

Actual size



- **IO-Link compatible**
- **IP67**
  - * For units with a D-sub connector/RJ45 connector, and when connected to S0700 manifolds, it is IP40.
- **Drives up to 32 solenoids**
- **Daisy-chain wiring communication**
  - * Excludes the units compatible with IO-Link



Compatible Protocols

Fieldbusses & Industrial Ethernet

PROFIBUS DeviceNet CC-Link PROFINET EtherNet/IP

EtherCAT ETHERNET POWERLINK IO-Link New CC-Link IE TSN

Safety Communication

PROFIsafe New Safety over EtherCAT

Compliant with functional safety standards p. 5

(PROFIsafe, Safety over EtherCAT® compatible)

- Product certification obtained by a third party
- Safety output for valve control

EX260 Series

SMC

CAT.E02-25E

Narrow Space saving installation

Approx. **28** mm

M12 communication connector x 2
(For daisy-chain wiring)

PROFIBUS

M12 communication connector x 1
(Same for the solenoid valve power supply wiring)

IO-Link

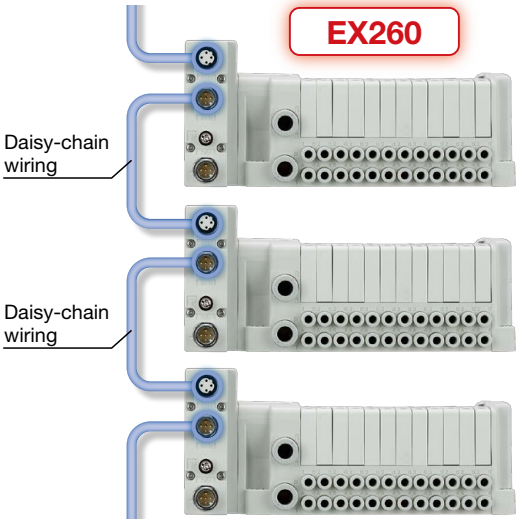
D-sub communication connector

PROFIBUS

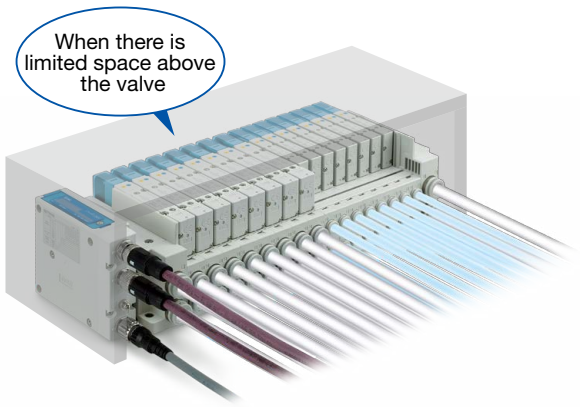
Daisy-chain wiring communication is possible.*1

A branch connector is not necessary/Reduced wiring space

*1 Excludes the units compatible with IO-Link



Wiring and piping from the same direction is possible.
(for side ported)



An external terminating resistor is not necessary.

(Only available for M12 PROFIBUS DP, CC-Link communication connectors)

ON/OFF switching is possible with an internal terminating resistor.
An external terminating resistor is not necessary.

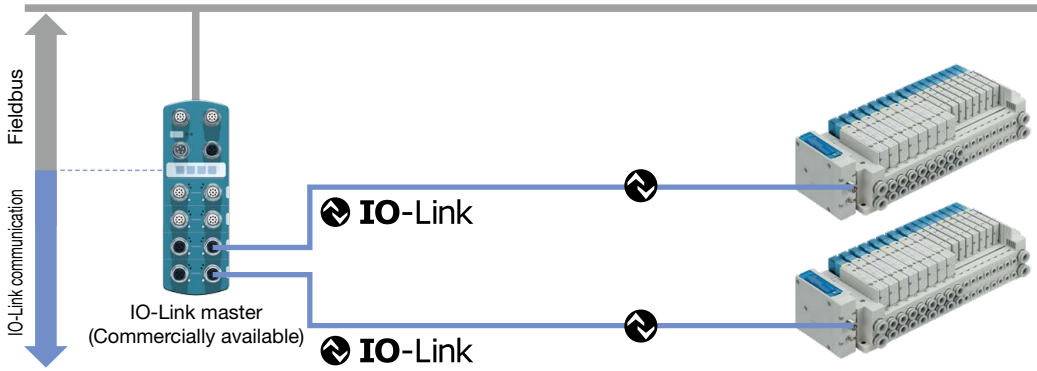
*1 Units with a D-sub communication connector/RJ45 communication connector are IP40.
*2 The JSY1000 is IP40.
*3 IO-Link compatible and CC-Link IE TSN compatible SI units do not have set up a manifold part number.

IO-Link compatible

Integratable with various existing networks

IO-Link devices can be easily connected to various networks via the IO-Link master, which acts as a gateway between IO-Link communication and various Fieldbusses.
Solenoid valves can be connected for communication without relying upon a Fieldbus or PLC.

CC-Link IE Field　CC-Link　EtherCAT　ETHERNET POWERLINK　PROFIBUS　PROFINET　EtherNet/IP　DeviceNet



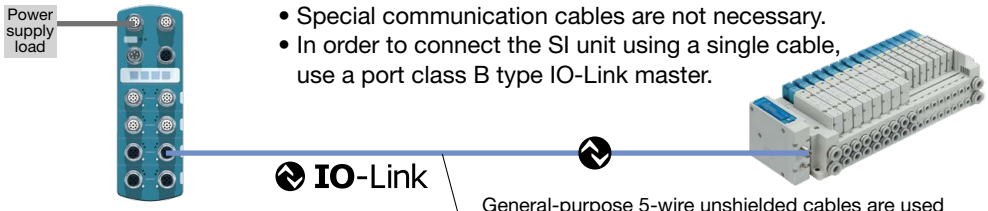
Can be connected using a single general-purpose cable, resulting in a reduction in the space required for wiring

Port class B compliant

Port class B

IO-Link master
(Commercially available)

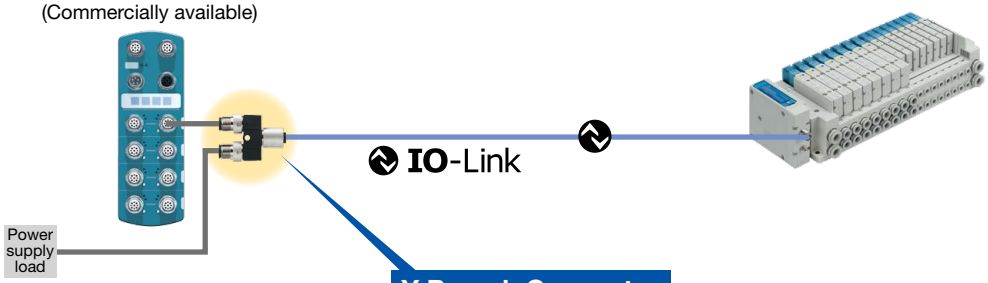
- Connect the IO-Link master port to the device using a 1:1 configuration.
- Connect using an M12 round connector.
- Maximum cable length: 20 m
- Special communication cables are not necessary.
- In order to connect the SI unit using a single cable, use a port class B type IO-Link master.



General-purpose 5-wire unshielded cables are used for connection.
The signal wire and valve power supply wire can be connected with the same cable.

Port class A

IO-Link master
(Commercially available)



SI unit/Connector pin arrangement

Pin no.	SI unit port pin function (Port class B)
1	+24 V for control unit
2	+24 V for solenoid valve
3	0 V for control unit
4	IO-Link communication
5	0 V for solenoid valve

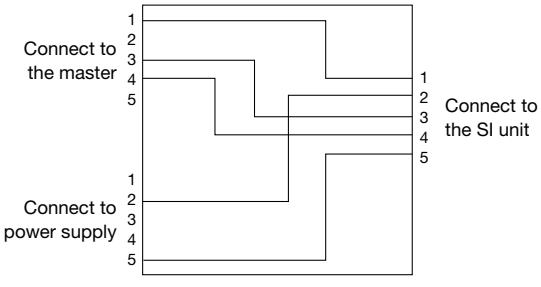
Difference between IO-Link master port class A and class B

Pin no.	IO-Link master port pin function	
	Port class A	Port class B
1	+24 V	+24 V
2	NC/DI/DO	Additional power supply +24 V
3	0 V	0 V
4	IO-Link/DI/DO	IO-Link/DI/DO
5	NC	Additional power supply 0 V

Y Branch Connector

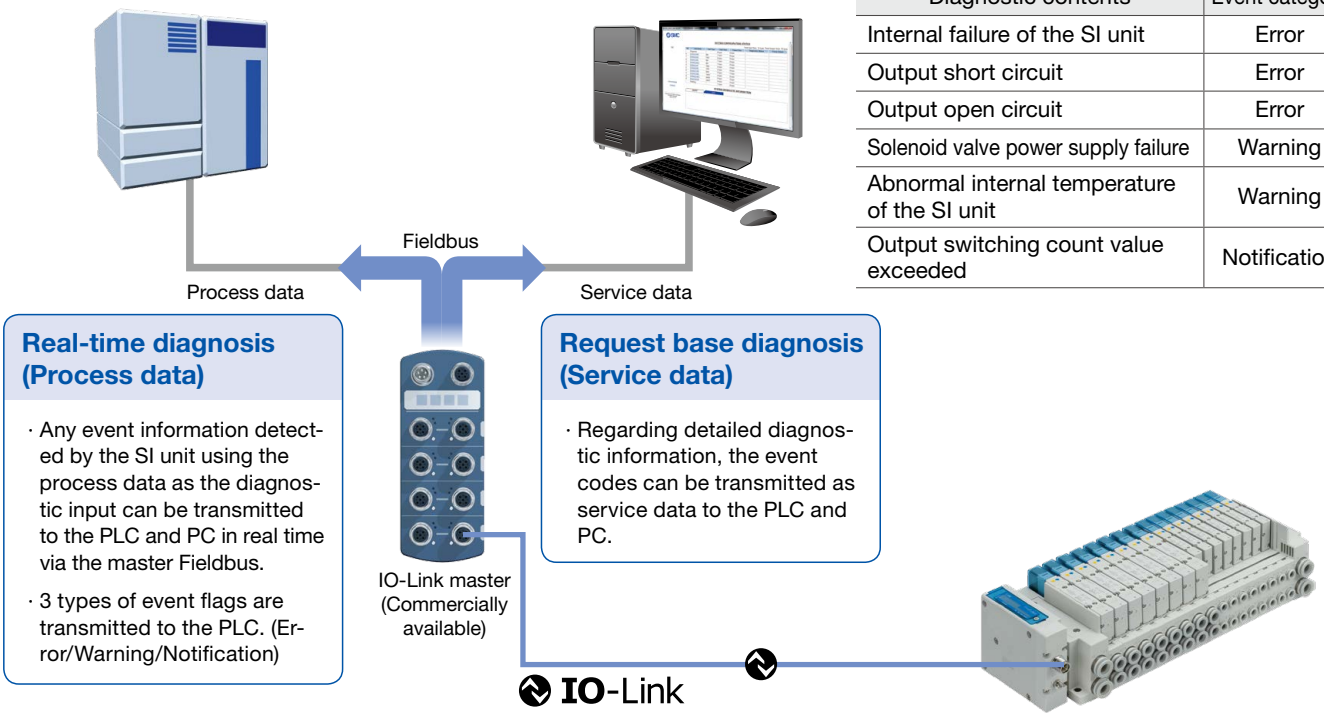
Port class A compliant
A special wiring Y branch connector is available.

Used when connecting to a port class A type IO-Link master, which is often used when connecting to an IO-Link sensor



IO-Link compatible

Features an impressive self-diagnosis function



Real-time diagnosis (Process data)

- Any event information detected by the SI unit using the process data as the diagnostic input can be transmitted to the PLC and PC in real time via the master Fieldbus.
- 3 types of event flags are transmitted to the PLC. (Error/Warning/Notification)

Request base diagnosis (Service data)

- Regarding detailed diagnostic information, the event codes can be transmitted as service data to the PLC and PC.

Self-diagnosis contents

Diagnostic contents	Event category
Internal failure of the SI unit	Error
Output short circuit	Error
Output open circuit	Error
Solenoid valve power supply failure	Warning
Abnormal internal temperature of the SI unit	Warning
Output switching count value exceeded	Notification

Equipped with a solenoid valve output operation count function

The number of valve operation instructions is counted for each output of the solenoid valve.

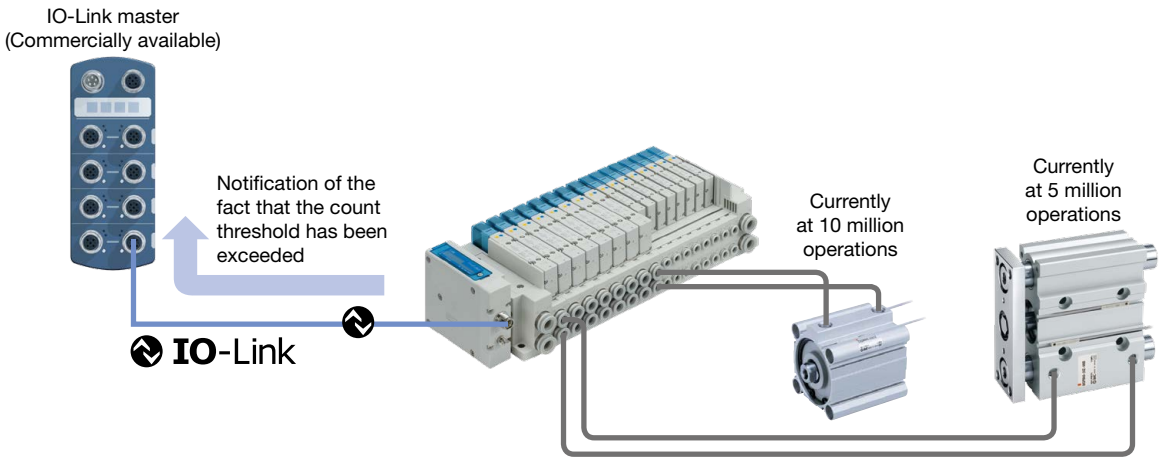
Set the count threshold value to be used as a guide for maintenance according to the operating conditions of the cylinder connected to the solenoid valve.

⬇

Once the threshold value is reached, notification of this fact will take place automatically.

⬇

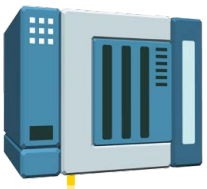
This enables periodic maintenance to be performed before any unexpected cylinder failures occur.



Supports safety communication

The safety communication protocol is a communication protocol that transmits safety-related data over a communication network and are compatible for use up to safety standard ISO 13849-1 PL e and IEC 61508/IEC 62061 SIL 3.

Examples of PROFIsafe and PROFINET compatible products.

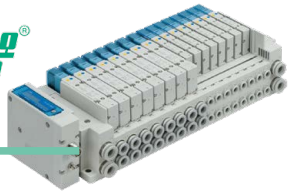


PROFINET/PROFIsafe compatible PLC

PROFIsafe

EX260-FPS1
(PROFIsafe compatible SI unit)

PROFINET



EX260-SPN□
(PROFINET compatible SI unit)

By using a PLC (programmable Logic Controller) which supports safety communication, an SI unit compatible with safety communication (EX260-F□□□) can be installed on the communication line connecting the SI unit (EX260-S□□□) to the PLC.

Compliant with safety standards

The purpose is to facilitate the safe design (compliant with ISO/IEC standards) of the customers devices and equipment, and the products have been certified by a third party organization (such as TÜV Rheinland) to be usable up to the levels of the following standards.

Product Safety
Functional Safety
TÜVRheinland CERTIFIED
www.tuv.com
ID 0600000000

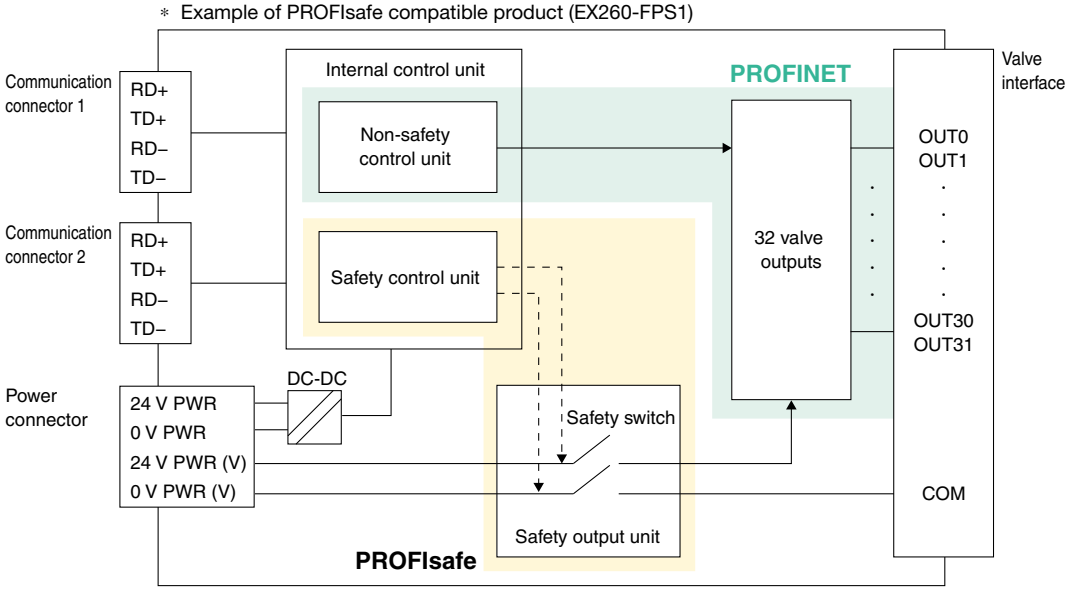
IEC 61508/IEC 62061 SIL 3
ISO 13849 PL e/Cat. 3

- **SIL (Safety Integrity Level)**
  A safety integrity level as defined by international standard IEC 61508/62061
  There are 4 levels of safety, with the lowest being SIL 1 and the highest being SIL 4.
- **PL (Performance Level)**
  A scale used to define the capability of safety-related parts to perform a safety function as defined by international standard ISO 13849
  There are 5 levels of safety function, with the lowest being PL a and the highest being PL e.

Safety Output

The product has a safety switch inside, and by turning OFF the safety switch via a command from the PLC, the voltage supplied to the valve is turned OFF and the product enters a safe state. The safety switch inside the product has redundancy and constantly undergoes diagnosis. The safety switch is turned OFF if an error is detected.

＊ Example of PROFIsafe compatible product (EX260-FPS1)



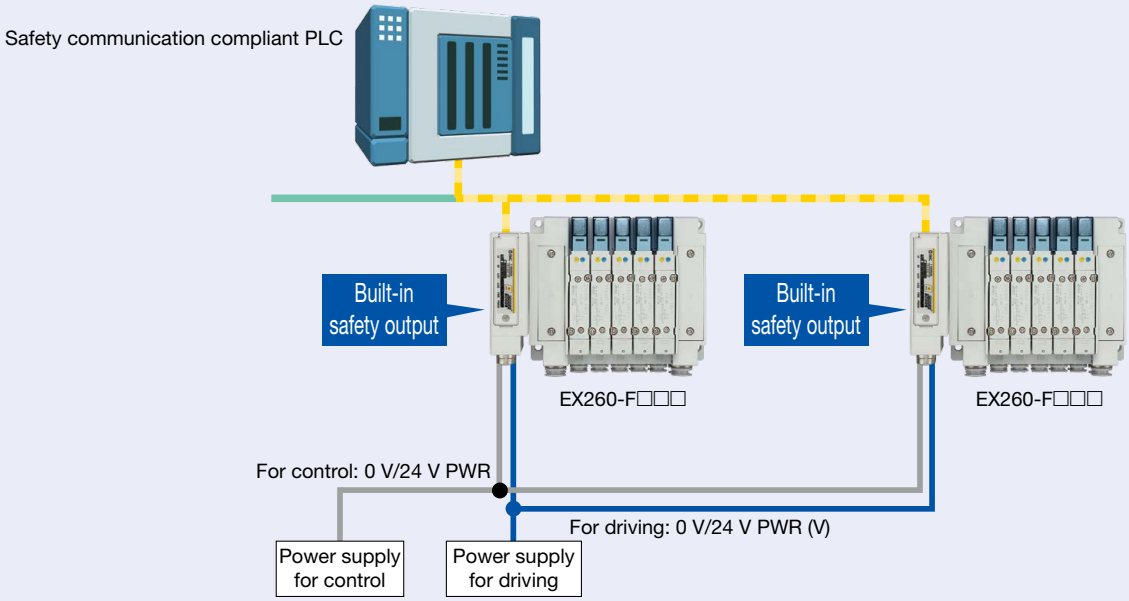
⚠Safety Definition

The safe state of this product is a condition in which the safety output described above is turned OFF to shut off the supply of power to the valve manifold. This product does not cover valve manifolds that are being used in connection with this product or the safety function and safe state of electric/air equipment that includes a peripheral circuit.

Reduced wiring, Space saving

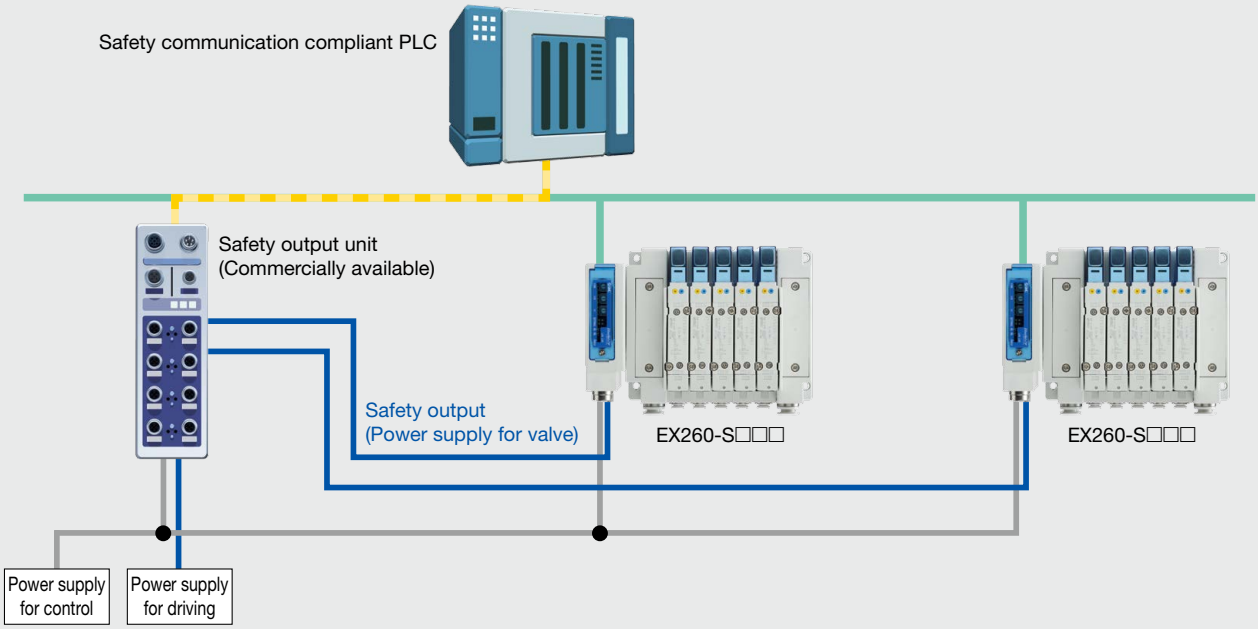
For safety communication compliant SI unit (EX260-F□□□)

- A separate safety output unit is not required. (Space saving)
- There is no need for wiring between the safety output unit and the SI unit. (Reduced wiring)



When a separate safety output unit is installed (Conventional connection example)

- A separate safety output unit is required. (Increased installation space)
- Increased wiring is required for connection with another unit. (Increased wiring)



⚠Safety of the machine or system

The manufacturer of the machine/system and its user are responsible for the safety of the machine/system. Use of this product requires machine/system safety concepts which are in accordance with the corresponding directives and standards, safety function validation, and hazard and risk analysis. Target SILs (IEC 61508/62061 compliance) and performance levels/categories (ISO 13849 compliance) are determined based on the risk analysis. For more information, refer to the “Safety of the machine or system” section in the operation manual.

Specifications

All SI Units Common Specifications

Power supply for control	**Power supply voltage**	21.6 to 26.4 VDC*1
	Internal current consumption	100 mA or less*4
Power supply for output	**Power supply voltage**	22.8 to 26.4 VDC*5
Environmental resistance	**Enclosure**	IP67*2
	Operating temperature range	−10 to +50°C
	Operating humidity range	35 to 85% RH (No condensation)
	Withstand voltage	500 VAC for 1 minute between terminals and housing
	Insulation resistance	10 MΩ or more (500 VDC measured via megohmmeter) between terminals and housing
Standards		CE/UKCA marking, UL (CSA) compliant
Weight		200 g
Accessories	**Mounting screw**	2 pcs.
	Seal cap (for M12 connector socket)	EX9-AWTS (1 pc.)*3

*1 The power supply voltage for the EX260-SDN□ is 11 to 25 VDC, for the EX260-SIL1 is 18 to 30 VDC, and for the EX260-FPS1/SCT1/FSE1 is 20.4 to 28.8 VDC.
*2 IP40 applies to EX260-SPR5/6/7/8, EX260-SCT1.
*3 Not provided for EX260-SPR5/6/7/8. The EX260-SCT1 is supplied with one dustproof cap for the RJ45 connector.
*4 The EX260-FPS1 is 200 mA or less, and the EX260-SCT1/FSE1 is 150 mA or less.
*5 The power supply for the EX260-SCT1/FPS1/FSE1 is 20.4 to 28.8 VDC. Check the specifications of the solenoid valve for the power supply details.

Conductor nominal cross section	0.34 mm²/AWG22
Wire O.D. (Including insulator)	1.27 mm
Min. bending radius (Fixed)	21.7 mm

*1 For CC-Link
*2 For power block

❺ Seal Cap (10 pcs.)

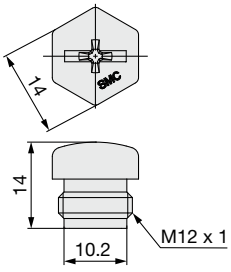
Use this on ports that are not being used for communication connector (M12 connector socket).
Use of this seal cap maintains the integrity of the IP67 enclosure.

* Tighten the seal cap with the prescribed tightening torque. (For M12: 0.1 N·m)

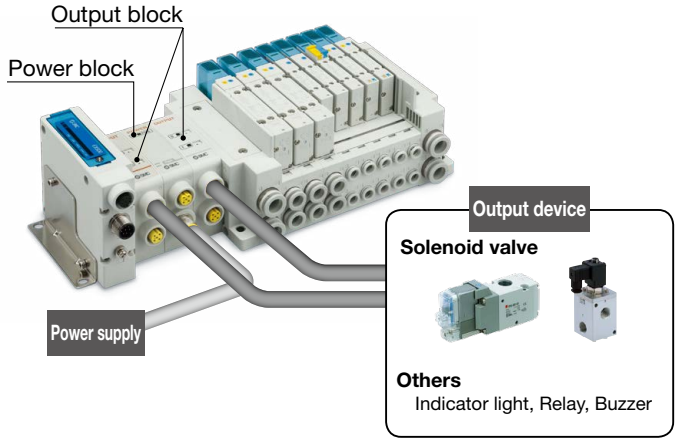
EX9-AW TS

Connector specification

TS	For M12 connector socket (10 pcs.)



For M12 connector socket



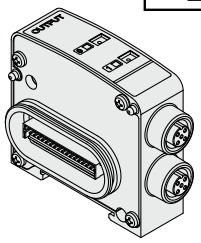
- **Output devices other than valve manifold can be operated.**
- **By using the power block and output block for high watt load, operation up to 0.5 A/point can be performed.**
- **It is possible to mount the output block and power block additionally between the SI unit and the solenoid valve (The surplus I/O points are used).**
- **2 point outputs per output block (M12 connector)**

Cannot be used with PROFIsafe compatible SI unit EX260-FPS1, or the Safety over EtherCAT® compatible SI unit EX260-FSE1.

You are requested to connect it to an SI unit and a valve manifold. For detailed specifications, refer to the operation manual that can be downloaded from SMC website: https://www.smcworld.com

❻ Output Block

EX9-OE T 1



Output specification

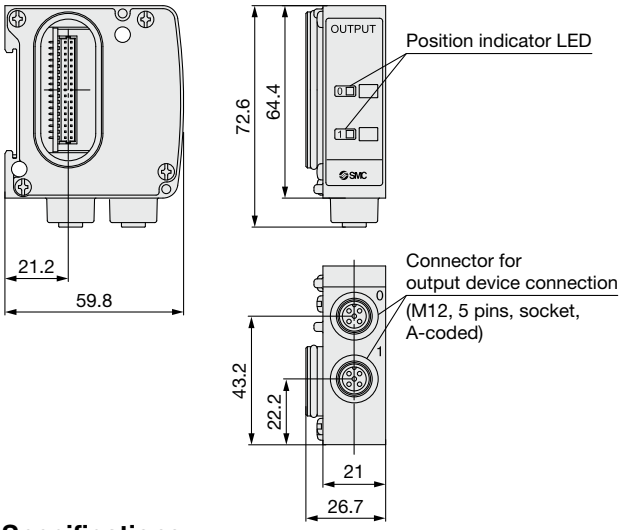
1	Source/PNP (Negative common)
2	Sink/NPN (Positive common)

Power supply type

T	Internal power supply method (for low-wattage load)
P	Integrated power supply method (for high-wattage load)*1

*1 Required to connect with a power block

Dimensions/Parts Description

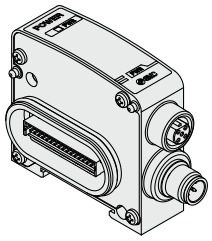


Specifications

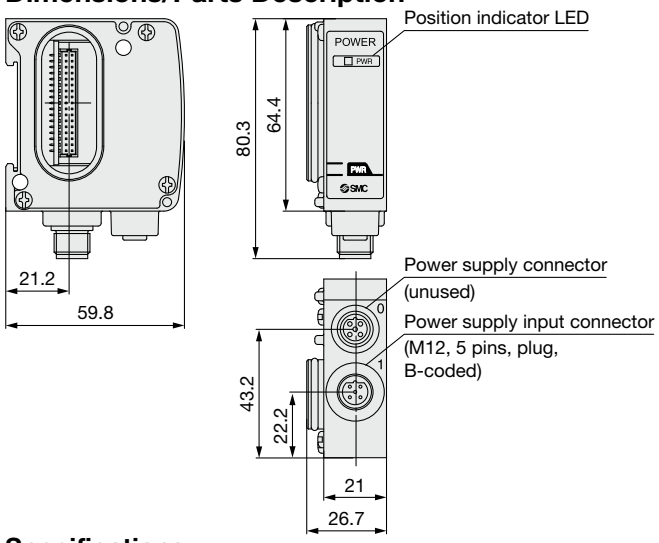
Model		EX9-OET1	EX9-OET2	EX9-OEP1	EX9-OEP2
Internal current consumption		40 mA or less			
Output	Output type	Source/PNP (Negative common)	Sink/NPN (Positive common)	Source/PNP (Negative common)	Sink/NPN (Positive common)
	Number of outputs	2 outputs			
	Power supply method	Internal power supply method		Integrated power supply method (Power block: supplied from EX9-PE1)	
	Output device supply voltage	24 VDC			
	Output device supply current	Max. 42 mA/point (1.0 W/point)		Max. 0.5 A/point (12 W/point)	
Environmental resistance	Enclosure	IP67			
	Operating temperature range	–10 to 50°C			
	Operating humidity range	35 to 85% RH (No condensation)			
Standards		CE/UKCA marking, UL (CSA)			
Weight		120 g			

❼ Power Block

EX9-PE1



Dimensions/Parts Description



Specifications

Model		EX9-PE1
Connection block		Output block for high wattage load
Connection block stations		Output block: Max. 8 stations
Power supply for output and internal control	Power supply voltage	22.8 to 26.4 VDC
	Internal current consumption	20 mA or less
Supply current		Max. 3.1 A*1
Environmental resistance	Enclosure	IP67
	Operating temperature range	–10 to 50°C
	Operating humidity range	35 to 85% RH (No condensation)
Standards		CE/UKCA marking, UL (CSA)
Weight		120 g
Enclosed parts		Seal cap (for M12 connector) 1 pc.

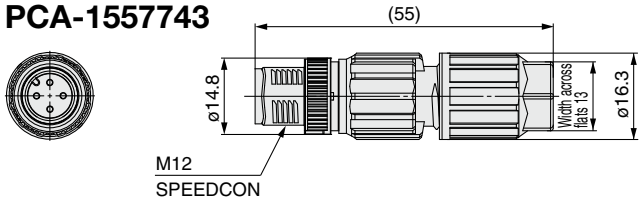
*1 When using with 3.0 to 3.1 A, the ambient temperature should not exceed 40°C, and do not bundle the cable.

Refer to page 25 for the power supply cable for power block.

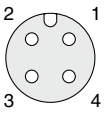
⑧ Connector for Output Block Wiring

Field-wireable connector for connecting an output device to an output block

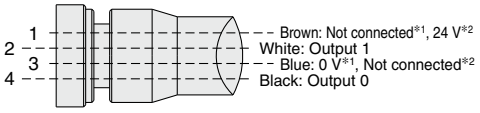
PCA-1557743



A-coded



Plug pin arrangement



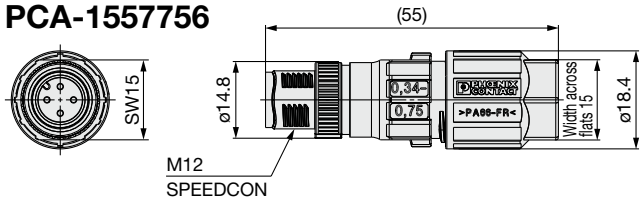
Connections

∗1 When used for EX9-OE□1
∗2 When used for EX9-OE□2

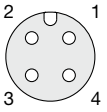
Applicable Cable

Item	Specifications
Cable O.D.	3.5 to 6.0 mm
Wire gauge (Stranded wire cross section)	0.14 to 0.34 mm²/AWG26 to 22
Core wire diameter (Including insulating material)	0.7 to 1.3 mm

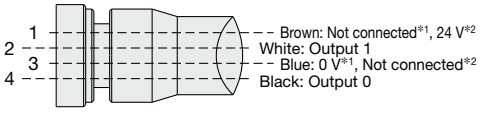
PCA-1557756



A-coded



Plug pin arrangement



Connections

∗1 When used for EX9-OE□1
∗2 When used for EX9-OE□2

Applicable Cable

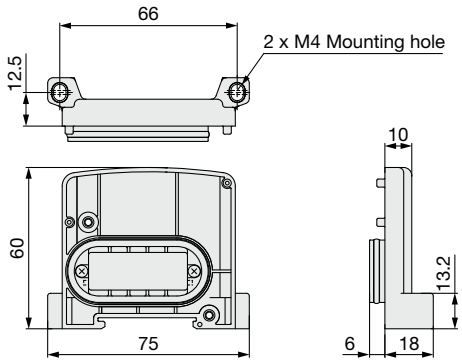
Item	Specifications
Cable O.D.	4.0 to 8.0 mm
Wire gauge (Stranded wire cross section)	0.34 to 0.75 mm²/AWG22 to 18
Core wire diameter (Including insulating material)	1.3 to 2.5 mm

Refer to page 25 for the power supply cable for power block.

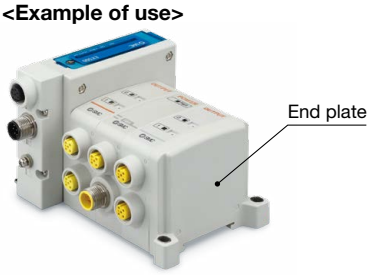
⑨ End Plate

Use when an output block is being used and a valve manifold is not connected.

EX9-EA03



<Example of use>



⑩ Bracket Plate/DIN Rail Mounting Bracket

A reinforcing brace used to mount an output block or power block onto an SI unit To prevent connection failure between products due to deflection, use this bracket plate whenever an output block or power block is mounted.

EX260 Series
Made to Order

Please contact SMC for detailed specifications and lead times.

Made to Order

SI Unit

Prepare the SI unit and valve manifold (without SI unit) separately, and combine them before use.

①EtherNet/IP™ LAN cable connectable RJ45 communication connectors

EX260-S EN 2 - X205

Communication protocol

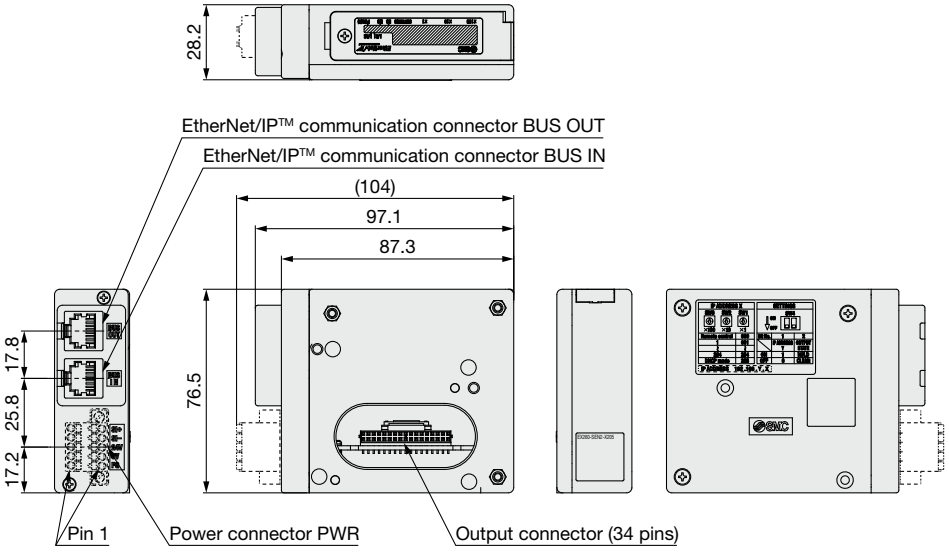
EN	EtherNet/IP™

Connector specification

X205	Communication connector: RJ45 Power connector: Spring type connector

Output specification

2	32 outputs, NPN (Positive common)/Sink



⚠Caution

The dimensions when combined with the valve manifold are the same as the dimensions of the valve manifold with a standard EX260 series unit mounted.

②EtherNet/IP™ Web server function compatible

EX260-SEN1-X194

- Web server compatible: Can conduct a solenoid valve operation test (ON/OFF), check communication state, set QuickConnect™, etc.
- Applicable to the power supply taken from Rockwell Automation's safe output module with pulse test function
- Compliant with QuickConnect™ class A specifications
- The gateway address is set to 192.168.□.001 when the IP address is set by the rotary switch.
- Dimensions are the same as those of the standard type.

Specific Product Precautions

Be sure to read this before handling the products. Refer to the back cover for safety instructions. For fieldbus system precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" on the SMC website: https://www.smcworld.com

Wiring

⚠ Caution

1. Select connectors that are ø16 or less if mounting valve manifolds directly using field-wireable connectors for SI unit power supply wiring.

Using large diameter connectors causes interference with the mounting surface.

The following cables with connectors are recommended.

■ For EX260-SPR□/-SDN□/-SEC□/-SPN□/-SEN□/-SPL□/-FPS1/-FSE1

<Cable with connector>

- EX500-AP□□□-□
- PCA-1401804/-1401805/-1401806

■ For EX260-SMJ□

<Cable with connector>

- EX9-AC□□□-1
- PCA-1401807/-1401808/-1401809

Operating Environment

⚠ Caution

1. Select the proper type of enclosure according to the operating environment.

IP67 is achieved when the following conditions are met.

1) Provide appropriate wiring between all units using electrical wiring cables, communication connectors and cables with M12 connectors.
2) Appropriately mount each unit and valve manifold.
3) Be sure to mount a seal cap on any unused connectors.

If using in an environment that is exposed to water splashes, please take measures such as using a cover.

When the enclosure is IP40, do not use in an operating environment or atmosphere where it may come in contact with corrosive gas, chemical agents, seawater, water, or water vapor.

When connected to the EX260-SPR5/6/7/8 and EX260-SCT1, manifold enclosure is IP40.

Adjustment / Operation

⚠ Caution

1. For details on programming and address setting, refer to the manual from the PLC manufacturer.

The programming content related to the protocol is designed by the manufacturer of the PLC used.

2. For the EX260-SPN□, the side of the SI unit may become hot.

It may cause burns.

⚠ Safety Instructions

These safety instructions are intended to prevent hazardous situations and/or equipment damage. These instructions indicate the level of potential hazard with the labels of **"Caution," "Warning"** or **"Danger."** They are all important notes for safety and must be followed in addition to International Standards (ISO/IEC)*1), and other safety regulations.

⚠ Danger : **Danger** indicates a hazard with a high level of risk which, if not avoided, will result in death or serious injury.

⚠ Warning: **Warning** indicates a hazard with a medium level of risk which, if not avoided, could result in death or serious injury.

⚠ Caution: **Caution** indicates a hazard with a low level of risk which, if not avoided, could result in minor or moderate injury.

*1) ISO 4414: Pneumatic fluid power - General rules and safety requirements for systems and their components
ISO 4413: Hydraulic fluid power - General rules and safety requirements for systems and their components
IEC 60204-1: Safety of machinery - Electrical equipment of machines - Part 1: General requirements
ISO 10218-1: Robots and robotic devices - Safety requirements for industrial robots - Part 1:Robots
etc.

⚠ Warning

1. The compatibility of the product is the responsibility of the person who designs the equipment or decides its specifications.

Since the product specified here is used under various operating conditions, its compatibility with specific equipment must be decided by the person who designs the equipment or decides its specifications based on necessary analysis and test results. The expected performance and safety assurance of the equipment will be the responsibility of the person who has determined its compatibility with the product. This person should also continuously review all specifications of the product referring to its latest catalog information, with a view to giving due consideration to any possibility of equipment failure when configuring the equipment.

2. Only personnel with appropriate training should operate machinery and equipment.

The product specified here may become unsafe if handled incorrectly. The assembly, operation and maintenance of machines or equipment including our products must be performed by an operator who is appropriately trained and experienced.

3. Do not service or attempt to remove product and machinery/ equipment until safety is confirmed.

1. The inspection and maintenance of machinery/equipment should only be performed after measures to prevent falling or runaway of the driven objects have been confirmed.
2. When the product is to be removed, confirm that the safety measures as mentioned above are implemented and the power from any appropriate source is cut, and read and understand the specific product precautions of all relevant products carefully.
3. Before machinery/equipment is restarted, take measures to prevent unexpected operation and malfunction.

4. SMC products cannot be used beyond their specifications. They are not developed, designed, and manufactured to be used under the following conditions or environments. Use under such conditions or environments is not allowed.

1. Conditions and environments outside of the given specifications, or use outdoors or in a place exposed to direct sunlight.
2. Use for nuclear power, railways, aviation, space equipment, ships, vehicles, military application, equipment affecting human life, body, and property, combustion equipment, entertainment equipment, emergency shut-off circuits, press clutches, brake circuits, safety equipment, etc., and use for applications that do not conform to standard specifications such as catalogs and operation manuals.
3. Use for interlock circuits, except for use with double interlock such as installing a mechanical protection function in case of failure. Please periodically inspect the product to confirm that the product is operating properly.

⚠ Caution

SMC develops, designs, and manufactures products to be used for automatic control equipment, and provides them for peaceful use in manufacturing industries.
Use in non-manufacturing industries is not allowed.
Products SMC manufactures and sells cannot be used for the purpose of transactions or certification specified in the Measurement Act of each country. The new Measurement Act prohibits use of any unit other than SI units in Japan.

Limited warranty and Disclaimer/ Compliance Requirements

The product used is subject to the following "Limited warranty and Disclaimer" and "Compliance Requirements".
Read and accept them before using the product.

Limited warranty and Disclaimer

1. The warranty period of the product is 1 year in service or 1.5 years after the product is delivered, whichever is first.*2)
   Also, the product may have specified durability, running distance or replacement parts. Please consult your nearest sales branch.
2. For any failure or damage reported within the warranty period which is clearly our responsibility, a replacement product or necessary parts will be provided.
   This limited warranty applies only to our product independently, and not to any other damage incurred due to the failure of the product.
3. Prior to using SMC products, please read and understand the warranty terms and disclaimers noted in the specified catalog for the particular products.

*2) **Suction cups (Vacuum pads) are excluded from this 1 year warranty.**
A suction cup (vacuum pad) is a consumable part, so it is warranted for a year after it is delivered.
Also, even within the warranty period, the wear of a product due to the use of the suction cup (vacuum pad) or failure due to the deterioration of rubber material are not allowed by the limited warranty.

Compliance Requirements

1. The use of SMC products with production equipment for the manufacture of weapons of mass destruction (WMD) or any other weapon is strictly prohibited.
2. The exports of SMC products or technology from one country to another are governed by the relevant security laws and regulations of the countries involved in the transaction. Prior to the shipment of a SMC product to another country, assure that all local rules governing that export are known and followed.

Revision History

Edition B
* EtherNet/IP™ has been added to applicable Fieldbus protocols.

Edition C
* The IO-Link compatible EX260-SIL1 has been added.
* Accessories and made-to-order specifications have been added.
* "How to Order Manifold" and "Dimensions" pages have been deleted.
* Number of pages has been decreased from 52 to 28.

Edition D
* A functional safety standard compliant product has been added.
* Number of pages has been increased from 28 to 32.

Edition E
* Added Safety over EtherCAT® and CC-Link IE TSN to the list of supported protocols.
* Number of pages has been increased from 32 to 33.

⚠ Safety Instructions	Be sure to read the "Handling Precautions for SMC Products" (M-E03-3) and "Operation Manual" before use.
