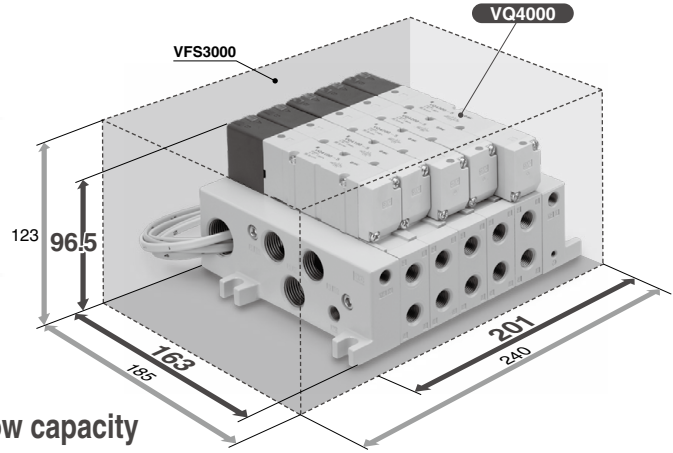
5 Port Solenoid Valve

VQ4000/5000 Series

Metal Seal | Rubber Seal

Installation volume
42% Reduction

Installation area
26% Reduction



- **Compact and large flow capacity**

VQ4000 Possible to drive cylinders up to Ø**160***

VQ5000 Possible to drive cylinders up to Ø**180***

* When the average speed is 200 mm/s. Refer to page 434 for actual conditions.

VQ4000: 25 mm pitch

C[dm³/(s·bar)]: 7.3*

VQ5000: 41 mm pitch

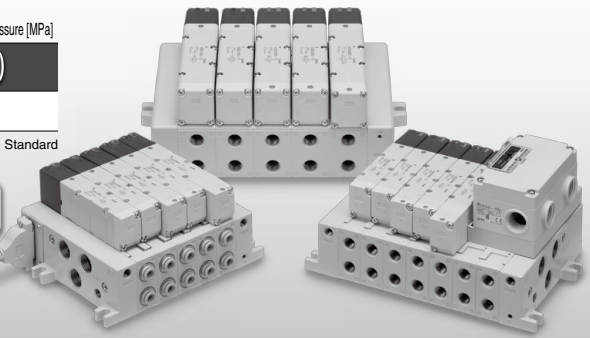
C[dm³/(s·bar)]: 17*

* 2-position single, rubber seal, 4/2 → 5/3 (A/B → R1/R2)

- **Power saving**

	Power consumption [W]	Maximum operating pressure [MPa]
VQ	**0.4** (0.95)	**1.0**
Current product	0.5 (1.0)	0.7

* Low wattage type ( ): Standard



- **Long service life**

100 million cycles (Metal seal)

* According to SMC life test conditions

- **Enclosure IP65 compliant Dust-tight/Water-jet-proof**

* When manifold is IP65 compliant.
* Except F and T1 kits

∗ Values at extension of a directly coupled cylinder when meter-out speed controllers are used with the needle full open.
∗ The average speed of the cylinder is obtained by dividing the stroke by the total stroke time.
∗ The load ratio is obtained by the following formula: ((Load mass x 9.8)/Theoretical output) x 100%

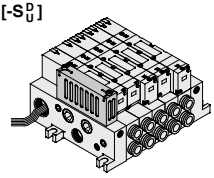
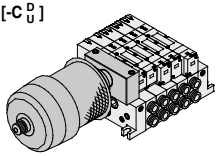
[-S$^{D}_{U}$]



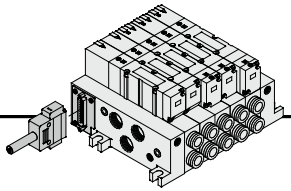
Manifold mounted exhaust cleaner
[-C$^{D}_{U}$]



Note 1) Release valve spacer and double check spacer with residual pressure exhaust cannot be combined with external pilot.
Note 2) Can be mounted on L kit only. For other kits, order E type control unit.
(Refer to pages 468 to 471.)

VQ4000 Series

F Kit (D-sub connector kit)



- **Simplification and labor savings for wiring work can be achieved by using a D-sub connector for the electrical connection.**
- **Using connector for flat ribbon cable (25P) conforming to MIL standard permits the use of connectors put on the market and gives a wide interchangeability.**
- **Connector entry can be selected on either the U side or the D side according to the mounting orientation.**
- **Maximum stations are 18.**

Manifold Specifications

Note) There is no polarity.
It can also be used as a negative common.

Special Wiring Specifications

Double wiring (connected to SOL. A and SOL. B) is used for the internal wiring of each station regardless of valve and option types.
Mixed single and double wiring is available as a semi-standard specification.

1. How to Order

Indicate option symbol "-K" in the manifold part number and be sure to specify station positions for single or double wiring on the manifold specification sheet.

2. Wiring specifications

Connections begin with the A side solenoid of the first station being connected to terminal no. 1, and continue in the order indicated by the arrows in the drawing without skipping any terminals.
Maximum stations are 18.

How to Order Manifold Assembly

Specify the part numbers for valves and options together beneath the manifold base part number.

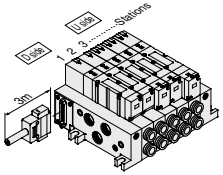
<Example>

D-sub connector kit with cable (3 m)

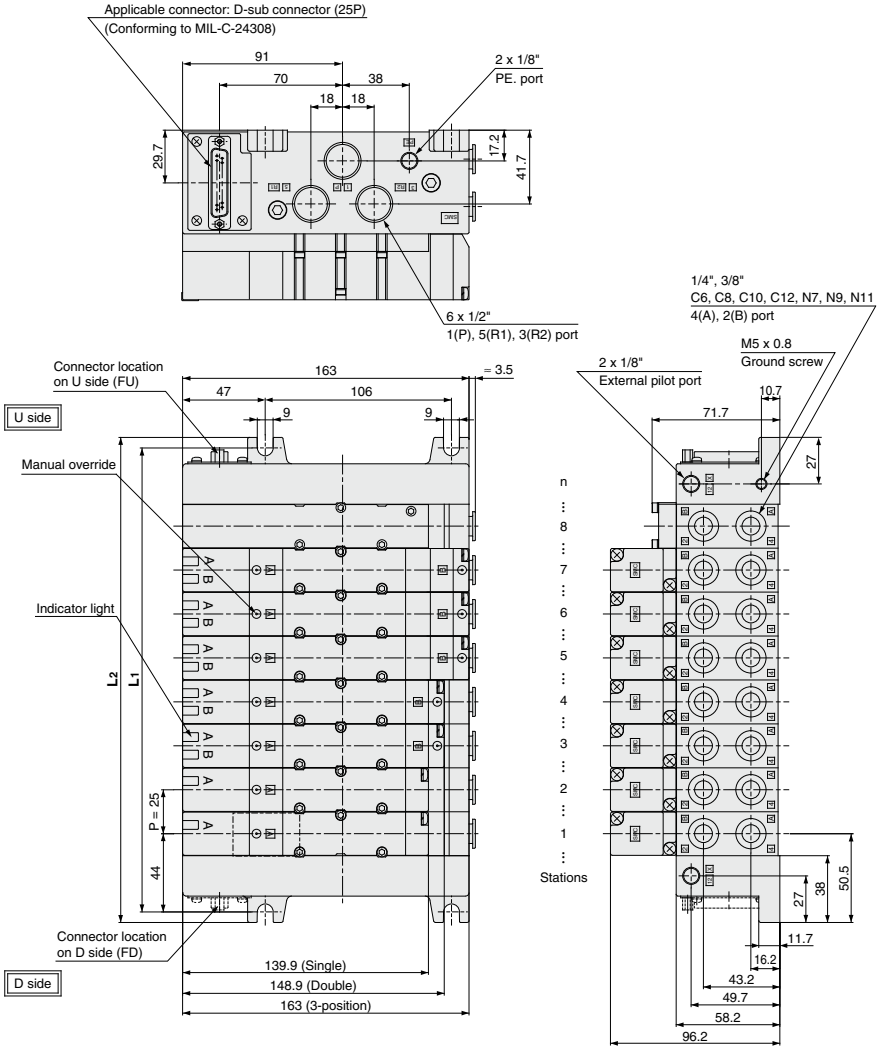
VV5Q41-05C8FD2(-Q)···1 set—Manifold base part no.
***VQ4100-51(-Q)·····2 sets—Valve part no. (Stations 1 and 2)**
***VQ4200-51(-Q)·····2 sets—Valve part no. (Stations 3 and 4)**
***VQ4300-51(-Q)·····1 set—Valve part no. (Station 5)**

Prefix the asterisk to the part nos. of the valve etc.

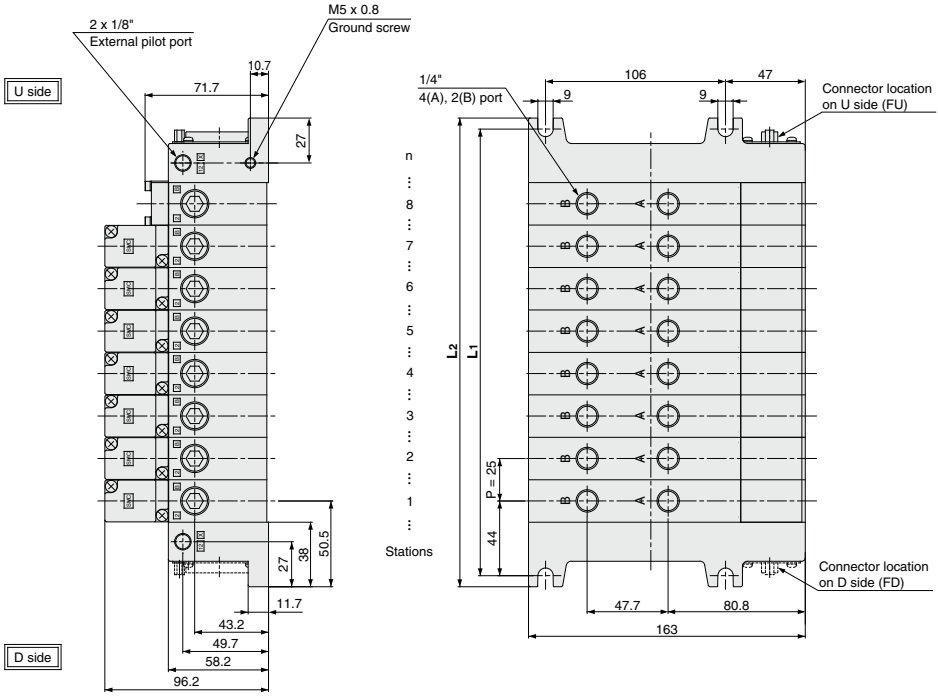
Enter in order starting from the first station on the D side. When entry of part numbers becomes complicated, indicate in the manifold specification sheet.



F Kit (D-sub connector kit)



Bottom ported drawing



Dimensions

Formula: $L_1 = 25n + 63$, $L_2 = 25n + 76$ n: Stations (Maximum standard 18 stations)

L \ n	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18

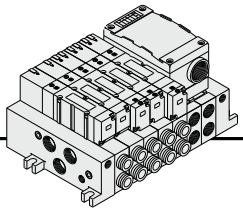
T Kit (Terminal block box kit)

IP65 compliant



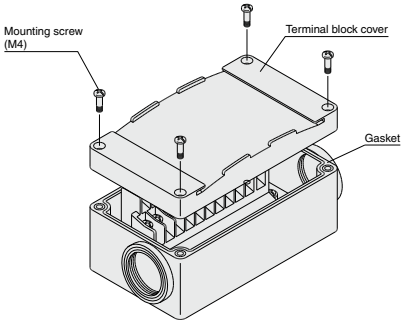
- **Enclosure IP65 compliant**
- **This type has a small terminal block inside a junction box. The provision of a G3/4 electrical entry allows connection of conduit fittings.**
- **Maximum stations are 18.**
- **2 stations are used for terminal box mounting.**

Manifold Specifications

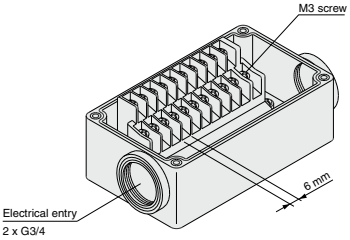
Series	Porting specifications			Applicable stations
	4(A), 2(B) port location	Port size		
		1(P), 5(R1), 3(R2)	4(A), 2(B)	
VQ4000	Side	1/2	C6, C8, C10, C12, 1/4, 3/8, N7, N9, N11	Max. 18 stations
	Bottom		1/4	

Terminal Block Connections

Step 1. How to remove terminal block cover
Loosen the 4 mounting screws (M4) and open the terminal block cover.



Step 2. The diagram on the right shows the terminal block wiring. All stations are provided with double wiring regardless of the valves which are mounted.
Connect each wire to the power supply side, according to the markings provided inside the terminal block.



Step 3. How to attach the terminal block cover
Securely tighten the screws with the torque shown in the table below, after confirming that the gasket is installed correctly.

Proper tightening torque [N·m]
0.7 to 1.2

- Applicable terminal: 1.25-3S, 1.25Y-3, 1.25Y-3N, 1.25Y-3.5
- Name plate: VVQ5000-N-T
- Drip proof plug assembly (for G3/4): AXT100-B06A

How to Order Manifold Assembly

Specify the part numbers for valves and options together beneath the manifold base part number.

<Example>
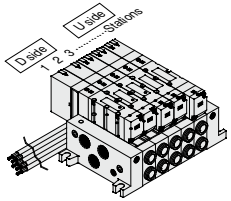
Connector kit
VV5Q45-05C12C(-Q)···1 set—Manifold base part no.
***VQ4150-5G1(-Q)·····2 sets—Valve part no. (Stations 1 and 2)**
***VQ4250-5G1(-Q)·····2 sets—Valve part no. (Stations 3 and 4)**
***VQ4350-5G1(-Q)·····1 set—Valve part no. (Station 5)**

Prefix the asterisk to the part nos. of the valve etc.

Enter in order starting from the first station on the D side. When entry of part numbers becomes complicated, indicate in the manifold specification sheet.



SMC

Circuit diagram

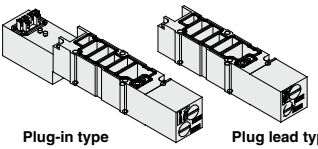
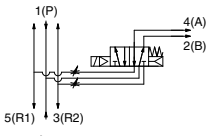
Restrictor spacer

VVQ4000-20A-1 (Plug-in type)
VVQ4000-20A-5 (Plug lead type)

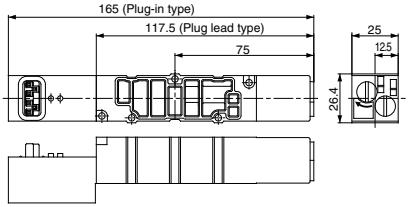
A restrictor spacer is mounted on a manifold block to control cylinder speed by throttling exhaust air flow.



Plug-in type　　Plug lead type



Circuit diagram

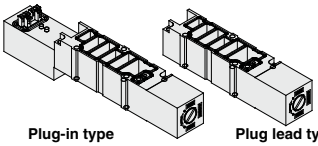


Note 1) A certain amount of leakage is allowed in the products' specifications. Tightening the needle to reduce leakage to zero may result in equipment damage.
Note 2) Products mentioned in this catalog are retainer types, so the needle is not removed completely. Over rotation will cause damage.

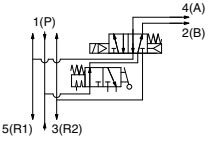
SUP stop valve spacer

VVQ4000-37A-1 (Plug-in type)
VVQ4000-37A-5 (Plug lead type)

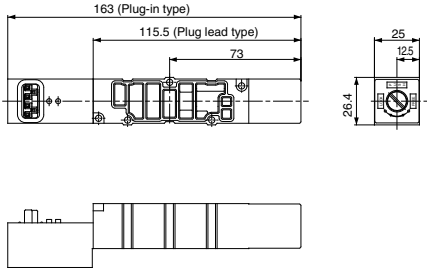
A SUP stop valve spacer is mounted on a manifold block, making it possible to individually shut off supply air to each valve.



Plug-in type　　Plug lead type



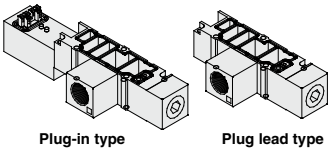
Circuit diagram



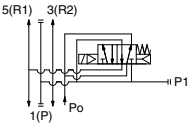
Release valve spacer: For D side mounting

VVQ4000-24A-1D (Plug-in type)
VVQ4000-24A-5D (Plug lead type)

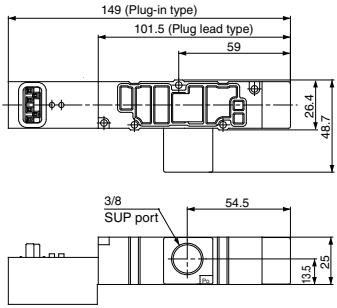
Combination of VQ41□□ (Single) and release valve spacer can be used as air release valve.
Note 1) Mounting on 2-position double and 3-position valve is not possible.
Note 2) Can be mounted on L kit only. For other kits, order E type control unit. (Refer to pages 468 to 471.)



Plug-in type　　Plug lead type



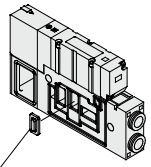
Circuit diagram



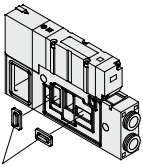
SUP/EXH block plate

VVQ4000-16A (1 pc./set)

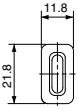
When supplying two different pressures to one manifold, this is used to shut off between stations with different pressures.

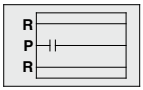


SUP blocking plate

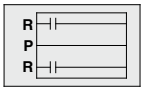


EXH blocking plate (Order q'ty: 2 pcs.)





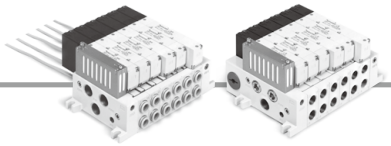
SUP passage blocked



EXH passage blocked

SUP/EXH passage blocked

<Passage blocked label>
Indication labels to confirm the blocking position are attached.
(Each for SUP passage, EXH passage, and SUP/EXH passage blocking positions)



Manifold Option Parts

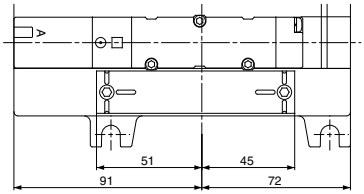
Direct exhaust with silencer box

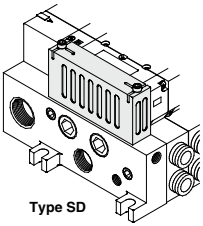
VV5Q4 $\frac{1}{5}$ -□□□-SB (Exhaust from both sides)
VV5Q4 $\frac{1}{5}$ -□□□-SD (D side exhaust)
VV5Q4 $\frac{1}{5}$ -□□□-SU (U side exhaust)

The EXH outlet is placed on the top side of the manifold end plate. The built-in silencer provides highly effective noise reduction. (Noise reduction of 35 dB(A) or more)

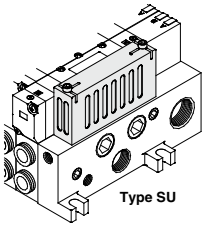
Effective area: 60.2 mm²

Note) Note that when excessive drainage occurs in the air supply, the drainage will be released along with the exhaust.

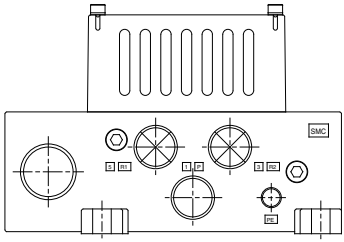


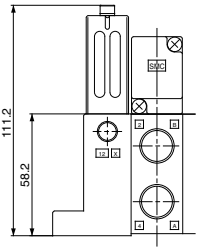


Type SD



Type SU





Note) Figure shows VV5Q41-□□□-SD.

• Silencer box assembly: VVQ4000-33A (With gasket, screw)

Double check spacer with residual pressure exhaust

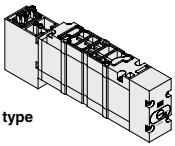
VVQ4000-25A-1 (Plug-in type)
VVQ4000-25A-5 (Plug lead type)

Can hold an intermediate cylinder position for an extended time.

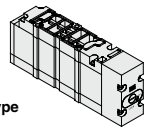
When combined with a double check spacer with built-in double check valve, it is unaffected by air leakage between the spool valves, making it possible to hold a cylinder at an intermediate stopping position for an extended time.
Besides, combination between 2-position solenoid valve (VQ4$\frac{1}{2}$□□) and double check spacer cannot hold an intermediate position, but can be used for drop prevention at the cylinder stroke end.

Specifications

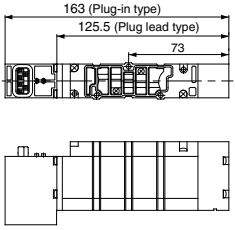
Double check spacer part no.	VVQ4000-25A-$\frac{1}{5}$	
	Intermediate stop	Drop prevention
Applicable solenoid valve	VQ44□□	VQ4$\frac{1}{2}$□□



Plug-in type



Plug lead type

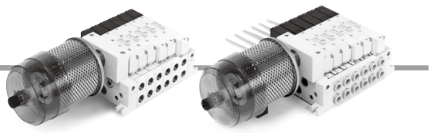


Manual override for residual pressure exhaust
Slotted locking type (Tool required)

⚠ Caution

Handling Precautions

- In the case of 3-position double check (VQ46$\frac{1}{5}$0), check the leakage from piping and fittings in between valve and cylinder by means of synthetic detergent solutions, and ensure that there is no such leakage found there. Also, check the leakage from cylinder seal and piston seal. If there is any leakage, sometimes the cylinder, when valve is de-energized, can move without stopping at intermediate position.
- Since One-touch fittings allow slight air leakage, screw piping is recommended when stopping the cylinder in the middle for a long time.
- If exhaust side of double check spacer is narrowed down, this causes a decrease in intermediate stop accuracy and may malfunction.
- Combining with 3-position valves "VQ4$\frac{3}{5}$□□" is not possible.
- Set the cylinder load so that the cylinder pressure will be within two times that of the supply pressure.
- Combining double check spacer with external pilot is not possible.

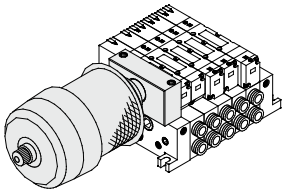


Manifold mounted exhaust cleaner

VV5Q4 $\frac{1}{5}$ -□□□-CD (D side mounting)

VV5Q4 $\frac{1}{5}$ -□□□-CU (U side mounting)

An adapter plate for exhaust cleaner mounting is provided on the top of the manifold end plate. The exhaust cleaner collects drainage and oil mist (99.9% or more) and is highly effective for noise reduction.
(Noise reduction of 35 dB(A) or more)



Applicable exhaust cleaner
AMC610-10 (Port size Rc 1)

Note 1) Exhaust cleaner AMC610-10 is not attached. Please order it separately.
Note 2) Mount so that the exhaust cleaner is at the lower side.
Note 3) For details about the exhaust cleaner, refer to the **Web Catalog**.

Effective area at exhaust side [mm²] S at P_2 = 0.5 MPa	**A → EA**	18		40		40	
	B → EB	37		19		37	

Note 1) Set the pressure within the operating pressure range of the valve.
Note 2) Operate an interface regulator only by applying pressure from the P port of the base, except when using it as a reverse pressure valve. When using it as a reverse pressure valve, P port regulation is not allowed to use.
Note 3) When using a perfect spacer, assemble a valve, a spacer regulator and a perfect spacer in this order to use it.
Note 4) When using in A port regulation, B port regulation by closed center, since there is a problem in its operation, please contact SMC.
Note 5) Dust-tight/Water-jet-proof (IP65) is not available with interface regulator.

Semi-standard Specifications

External Pilot Specifications

- When the supply air pressure is:
  - lower than the required minimum operating pressure 0.15 to 0.2 MPa,
  - opposite air supply (R port supply), cylinder supply (A and B port supply),
  - used for vacuum specification, it can be used for external pilot specification. Order a valve by adding the external pilot specification [R] to the part number. External pilot is available as standard for manifolds and options.
- Internal/external pilot can be mounted in a manifold.
- Compatibility with universal porting is possible for the single, double and 3-position (excluding double check) types.

Note) Electrical entry: Control unit can not be removed except L and C kits.

Use of Control Unit

<Construction and piping>

1. The supply pressure (Po) passes through the filter regulator (1) and is adjusted to the prescribed pressure. Next, it goes through the release valve (2) (outlet residual pressure switching function used as normally ON) and is supplied to the manifold base side (P).

2. Supply pressure from Po port is blocked when release valve (2) is OFF. Air supplied to manifold side P port is exhausted to R1 port through release valve (2).

3. Pressure switch is piped at outlet side of release valve (2). (Release valve (2) is operated at energizing.) Also, since there is an internal voltage drop of 4 V, it may not be possible to confirm the OFF and ON states with a tester, etc.

<Wiring>

1. Electrical entry of manifold (except L and C kit) is individual wiring. For details, refer to internal wiring figure of each kit. Cable length is 0.6 m for L kit.

<Change of pressure switch piping>

1. Pressure switch (3) is changed to piping on inlet side of release valve (2), remove the pressure switch, reverse the gasket up and down, and fix B mark.

2. When pressure switch is mounted, tightening torque of bolt is 0.8 to 1.2 N·m.

Standard Specifications

Valve specifications	Valve construction		Metal seal	Rubber seal
	Fluid		Air	
	Max. operating pressure		1.0 MPa	
	Min. operating pressure	Single	0.10 MPa	0.20 MPa
		Double	0.10 MPa	0.15 MPa
		3-position	0.15 MPa	0.20 MPa
	Ambient and fluid temperature		–10 to 50°C Note 1)	
	Lubrication		Not required	
	Manual override		Push type/Locking type (Tool required)	
	Impact/Vibration resistance		150/30 m/s² Note 2)	
	Enclosure		Dust-tight (IP65 compatible) Note 3)	
Electrical specifications	Coil rated voltage		12, 24 VDC, 100, 110, 200, 220 VAC (50/60 Hz)	
	Allowable voltage fluctuation		±10% of rated voltage	
	Coil insulation type		Class B or equivalent	
	Power consumption [W]	DC	Standard	0.95
			Low wattage type	0.4
	Apparent power [VA]	AC	100 V	1.19
			110 V	1.32
			200 V	1.90
			220 V	2.08

Note 1) Use dry air to prevent condensation when operating at low temperatures.
Note 2) Impact resistance: No malfunction occurred when it is tested with a drop tester in the axial direction and at the right angles to the main valve and armature in both energized and de-energized states every once for each condition. (Values at the initial period)
Vibration resistance: No malfunction occurred in a one-sweep test between 45 and 2000 Hz. Test was performed at both energized and de-energized states in the axial direction and at the right angles to the main valve and armature. (Values at the initial period)
Note 3) Available only with T, L, S and C.

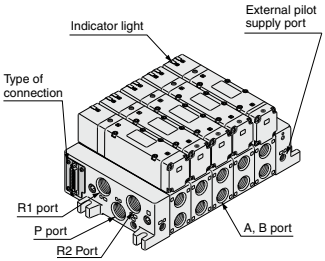
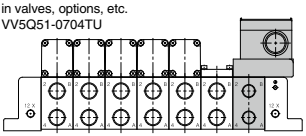
W	IP65 enclosure (Except F and T1 kits)

Note 1) When multiple symbols are specified, indicate them by letter in the order that they appear in the table, starting from the top. Example) -CU1K
Note 2) Combination of [C$^{U}_{D}$□] and [S$^{U}_{D}$] is not possible. Also, exhaust cleaner is not attached. Please order it separately.
Note 3) Available only with F, L and T1 kits.
Note 4) Specify the wiring specifications on the manifold specification sheet. (Except L kit)



Note) Figure shows VV5Q51-0504FD0.

S, T kit
When mounting a terminal block box or serial unit, be aware that they take up 2 stations of the manifold. In the drawing below, you can see that of the 8 manifold stations, 6 stations are available to be used for built-in valves, options, etc.
VV5Q51-0704TU



Note) For the T kit and S kit, one station is required to mount the terminal block box or SI Unit, so the minimum number of stations is 2 stations.

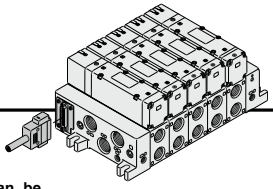
VQ5000 Series

F Kit (D-sub connector kit)



- **Simplification and labor savings for wiring work can be achieved by using a D-sub connector for the electrical connection.**
- **Using connector for flat ribbon cable (25P) conforming to MIL standard permits the use of connectors put on the market and gives a wide interchangeability.**
- **Connector entry can be selected on either the U side or the D side according to the mounting orientation.**
- **Maximum stations are 12.**

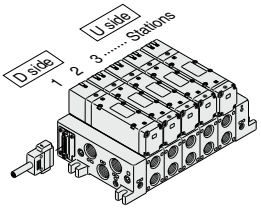
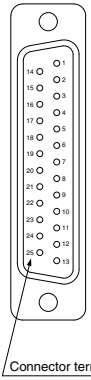
SMC

● Electrical wiring specifications



Stations are counted starting from the first station on the D side.

D-sub connector



Connector terminal no.

Double wiring (connected to SOL. A and SOL. B) is adopted for the internal wiring of each station, regardless of valve and option types.
Mixed single and double wiring is available as a semi-standard specification. For details, refer to below.

Standard wiring

	Terminal no.	Polarity		D-sub connector assembly (AXT100-DS25-015/030/050) Wire colors: Lead wire color	Dot marking
1 station	SOL.A 1	(–)	(+)	Black	None

	SOL.B 25	(–)	(+)	White	None
	COM. 13	(+)	(–) Note)	Orange	Red
		Positive common specifications	Negative common specifications		

Special Wiring Specifications

Double wiring (connected to SOL. A and SOL. B) is used for the internal wiring of each station regardless of valve and option types.
Mixed single and double wiring is available as a semi-standard specification.

1. How to Order
Indicate option symbol "-K" in the manifold part number and be sure to specify station positions for single or double wiring on the manifold specification sheet.

2. Wiring specifications
Connections begin with the A side solenoid of the first station being connected to terminal no. 1, and continue in the order indicated by the arrows in the drawing without skipping any terminals.
However, the maximum number of stations is 12.

Note 4) When multiple symbols are specified, indicate them alphabetically.

How to Order Manifold Assembly

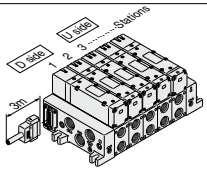
Specify the part numbers for valves and options together beneath the manifold base part number.

<Example>
D-sub connector kit with cable (3 m)

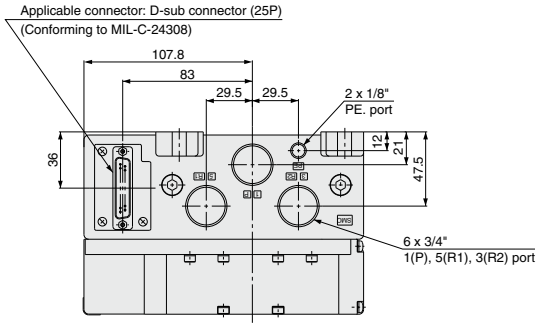
VV5Q51-0503FD2(-Q)···1 set—Manifold base part no.
***VQ5100-51(-Q)·····2 sets—Valve part no. (Stations 1 and 2)**
***VQ5200-51(-Q)·····2 sets—Valve part no. (Stations 3 and 4)**
***VQ5300-51(-Q)·····1 set—Valve part no. (Station 5)**

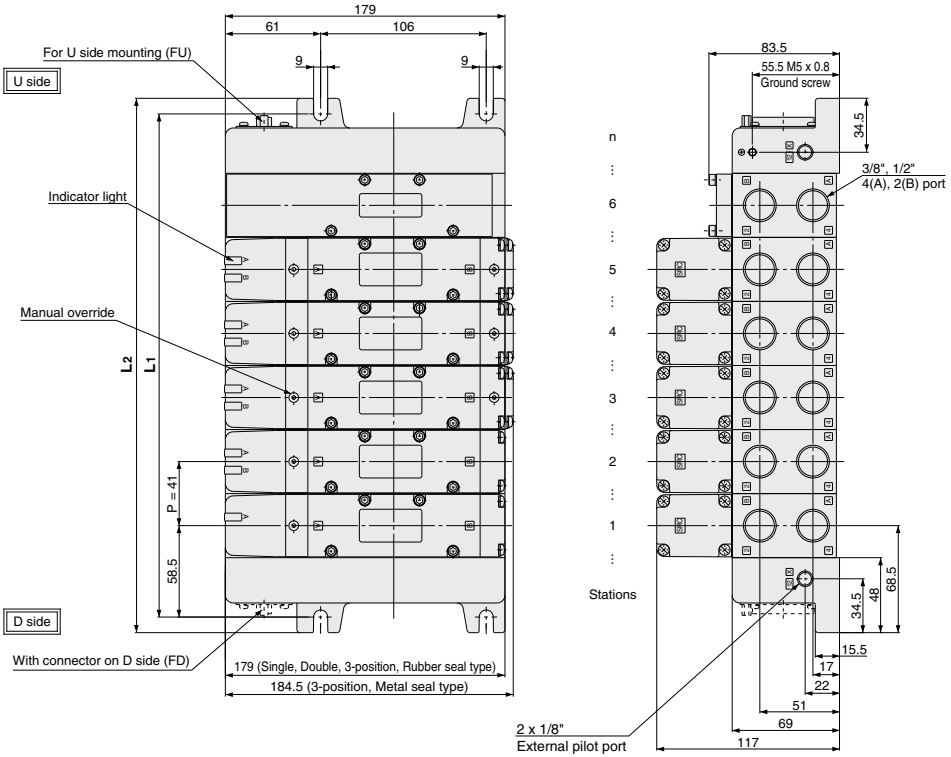
Prefix the asterisk to the part nos. of the valve etc.

Enter in order starting from the first station on the D side. When entry of part numbers becomes complicated, indicate in the manifold specification sheet.

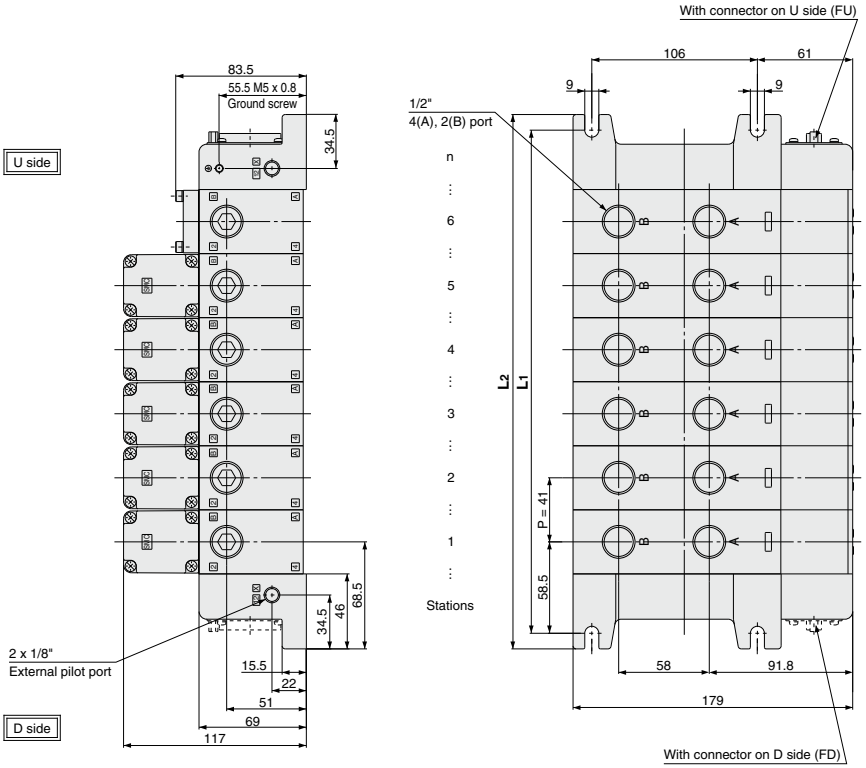


F Kit (D-sub connector kit)





Bottom ported drawing



Dimensions

Formula: $L_1 = 41n + 76$, $L_2 = 41n + 96$ n: Stations (Maximum 12 stations)

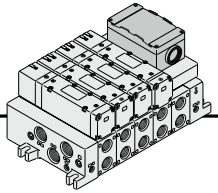
VQ5000 Series

T Kit (Terminal block box kit)

IP65 compliant



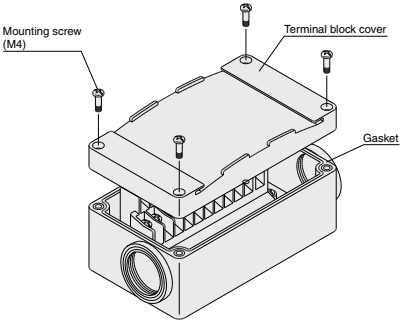
- **Enclosure IP65 compliant**
- **This type has a small terminal block inside a junction box. The provision of a G3/4 electrical entry allows connection of conduit fittings.**
- **Maximum stations are 11. (12 stations as a semi-standard specification)**
- **1 station is used for terminal block box mounting.**

Manifold Specifications

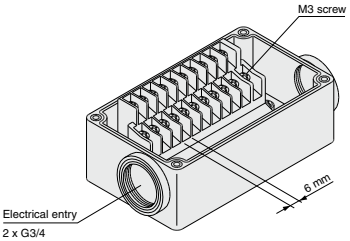
Series	Porting specifications			Applicable stations
	4(A), 2(B) port location	Port size		
		1(P), 5(R1), 3(R2)	4(A), 2(B)	
VQ5000	Side	3/4	3/8 1/2	Max. 12 stations
	Bottom		1/2	

Terminal Block Connections

Step 1. How to remove terminal block cover
Loosen the 4 mounting screws (M4) and open the terminal block cover.



Step 2. The diagram on the right shows the terminal block wiring. All stations are provided with double wiring regardless of the valves which are mounted.
Connect each wire to the power supply side, according to the markings provided inside the terminal block.



Step 3. How to attach the terminal block cover
Securely tighten the screws with the torque shown in the table below, after confirming that the gasket is installed correctly.

Proper tightening torque [N·m]
0.7 to 1.2

- Applicable terminal: 1.25-3S, 1.25Y-3, 1.25Y-3N, 1.25Y-3.5
- Name plate: VVQ5000-N-T
- Dripproof plug assembly (for G3/4): AXT100-B06A

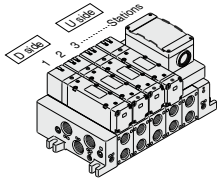
How to Order Manifold Assembly

Specify the part numbers for valves and options together beneath the manifold base part number.

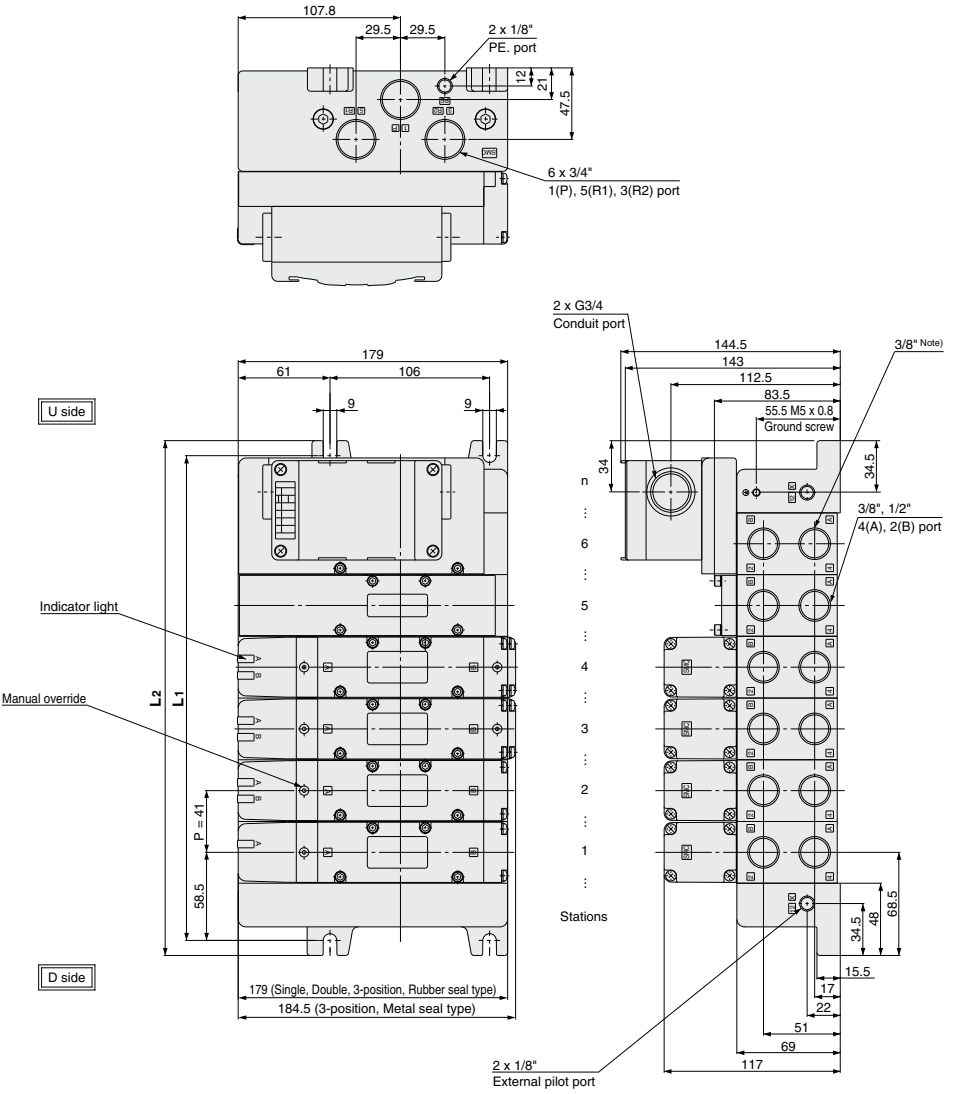
<Example>
Terminal block box kit
VV5Q51-0603TU(-Q)···1 set—Manifold base part no.
***VQ5100-51(-Q)·····2 sets—Valve part no. (Stations 1 and 2)**
***VQ5200-51(-Q)·····2 sets—Valve part no. (Stations 3 and 4)**
***VQ5300-51(-Q)·····1 set—Valve part no. (Station 5)**

Prefix the asterisk to the part nos. of the valve etc.

Enter in order starting from the first station on the D side. When entry of part numbers becomes complicated, indicate in the manifold specification sheet.

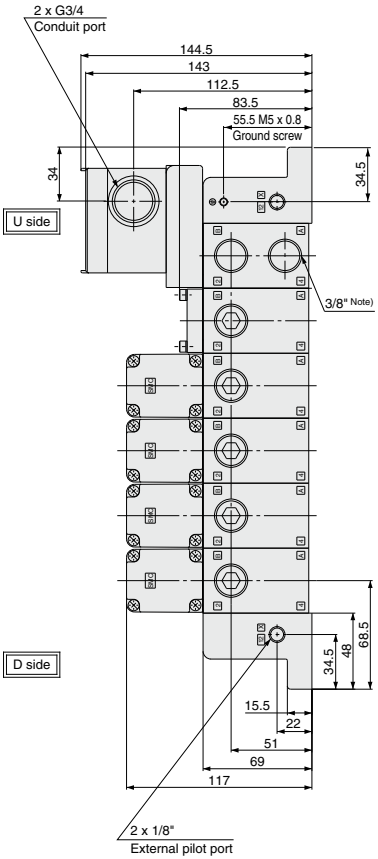


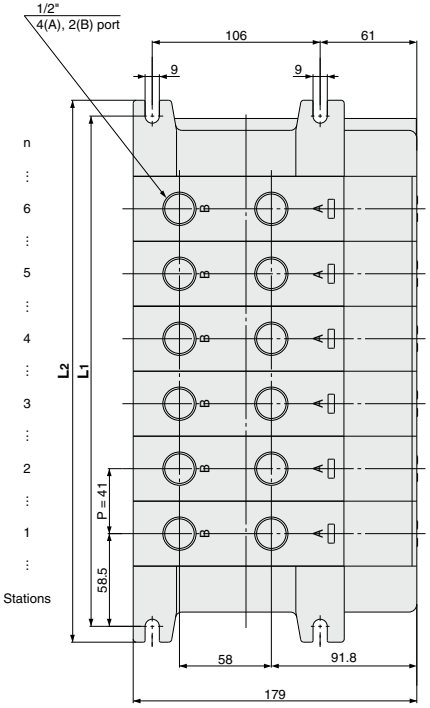
T Kit (Terminal block box kit)



Note) 4(A) and 2(B) port at the bottom of the terminal block box are 3/8".

Bottom ported drawing





Note) 4(A) and 2(B) port at the bottom of the terminal block box are 3/8".

Formula: $L_1 = 41n + 76$, $L_2 = 41n + 96$
n: Stations (Maximum 12 stations)
∗ Including 1 station for mounting terminal box.

Dimensions

L \ n	2	3	4	5	6	7	8	9	10	11	12

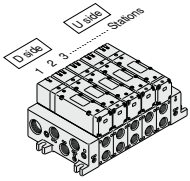
How to Order Manifold Assembly

Specify the part numbers for valves and options together beneath the manifold base part number.

<Example>
Individual terminal block kit
VV5Q51-0503T1(-Q)···1 set—Manifold base part no.
***VQ5100-51(-Q)·····2 sets—Valve part no. (Stations 1 and 2)**
***VQ5200-51(-Q)·····2 sets—Valve part no. (Stations 3 and 4)**
***VQ5300-51(-Q)·····1 set—Valve part no. (Station 5)**

Prefix the asterisk to the part nos. of the valve etc.

Enter in order starting from the first station on the D side. When entry of part numbers becomes complicated, indicate in the manifold specification sheet.



T1 Kit (Individual terminal block kit)

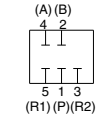
Plug-in type　　Plug lead type



Circuit diagram

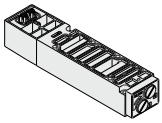
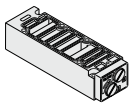
Restrictor spacer

VVQ5000-20A-1 (Plug-in type)
VVQ5000-20A-5 (Plug lead type)

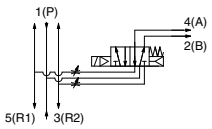
A restrictor spacer is mounted on a manifold block to control cylinder speed by throttling exhaust air flow.



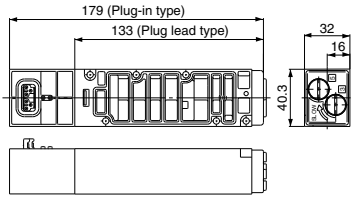
Plug-in type



Plug lead type



Circuit diagram

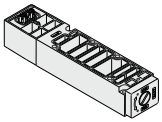


Note 1) A certain amount of leakage is allowed in the products' specifications. Tightening the needle to reduce leakage to zero may result in equipment damage.
Note 2) Products mentioned in this catalog are retainer types, so the needle is not removed completely. Over rotation will cause damage.

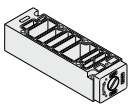
SUP stop valve spacer

VVQ5000-37A-1 (Plug-in type)
VVQ5000-37A-5 (Plug lead type)

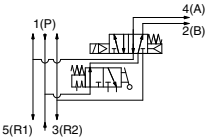
A SUP stop valve spacer is mounted on a manifold block, making it possible to individually shut off supply air to each valve.



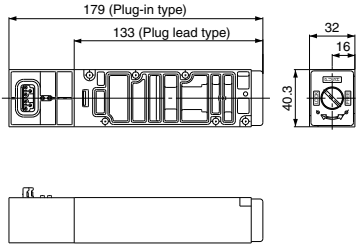
Plug-in type



Plug lead type



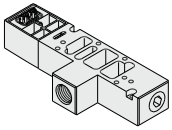
Circuit diagram



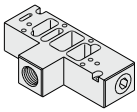
Release valve spacer: For D side mounting

VVQ5000-24A-1D (Plug-in type)
VVQ5000-24A-5D (Plug lead type)

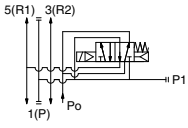
A VQ51□□ (single) valve can be used as an air release valve by combining it with a release valve spacer.
Note) 2-position double and 3-position cannot be mounted.



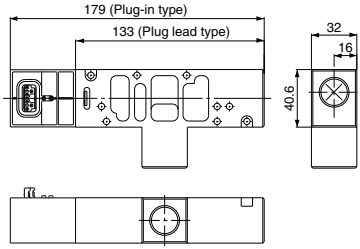
Plug-in type



Plug lead type



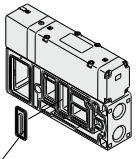
Circuit diagram



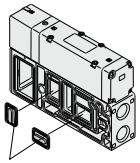
SUP block plate
VVQ5000-16A-1

EXH block plate
VVQ5000-16A-2

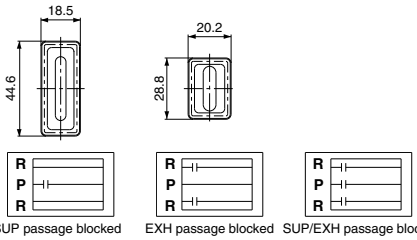
When supplying two different pressures to one manifold, this is used to shut off between stations with different pressures.



SUP blocking plate



EXH blocking plate
(Order q'ty: 2 pcs.)



<Passage blocked label>
Indication labels to confirm the blocking position are attached.
(Each for SUP passage and SUP/EXH passage blocking positions
Each for EXH passage and SUP/EXH passage blocking positions)

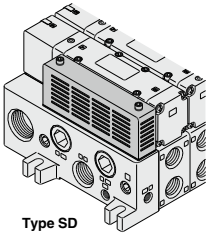
Manifold Option Parts

Direct exhaust with silencer box

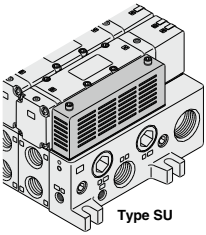
VV5Q5 $\frac{1}{5}$ -□□□-SD (D side exhaust)
VV5Q5 $\frac{1}{5}$ -□□□-SU (U side exhaust)
VV5Q5 $\frac{1}{5}$ -□□□-SB (Exhaust from both sides)

The EXH outlet is placed on the top side of the manifold end plate. The built-in silencer provides highly effective noise reduction. (Noise reduction of 35 dB(A) or more)

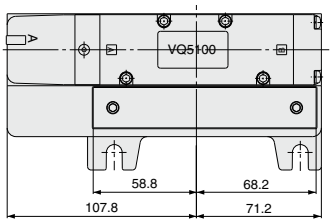
Note) Note that when excessive drainage occurs in the air supply, the drainage will be released along with the exhaust.

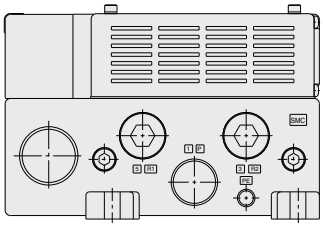


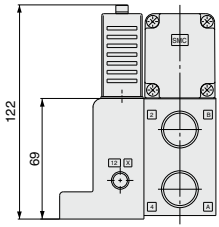
Type SD



Type SU







Note) Figure shows VV5Q51-□□□-SD.

• Silencer box assembly: VVQ5000-75A (With gasket, screw)

Double check spacer with residual pressure exhaust

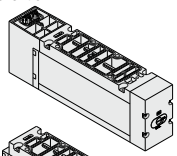
VVQ5000-25A-1 (Plug-in type)
VVQ5000-25A-5 (Plug lead type)

Can hold an intermediate cylinder position for an extended time.
When combined with a double check spacer with built-in double check valve, it is unaffected by air leakage between the spool valves, making it possible to hold a cylinder at an intermediate stopping position for an extended time.
Besides, combination between 2-position solenoid valve (VQ5$\frac{1}{2}$□□) and double check spacer can be used for drop prevention.

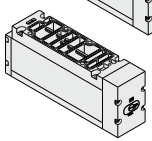
Specifications

Double check spacer part no.	VVQ5000-25A-$\frac{1}{5}$	
	Intermediate stop	Drop prevention
Applicable solenoid valve	VQ54□□	VQ5$\frac{1}{2}$□□

Plug-in type



Plug lead type



⚠Caution

Handling Precautions

- In the case of 3-position double check (VQ56$\frac{00}{51}$0), check the leakage from piping and fittings in between valve and cylinder by means of synthetic detergent solutions, and ensure that there is no such leakage found there. Also, check the leakage from cylinder seal and piston seal. If there is any leakage, sometimes the cylinder, when valve is de-energized, can move without stopping at intermediate position.
- If exhaust side of double check spacer is narrowed down, this causes a decrease in intermediate stop accuracy and may malfunction.
- Combination with 3-position valves "VQ5$\frac{3}{5}$□□" is not possible.
- Set the cylinder load so that the cylinder pressure will be within two times that of the supply pressure.

Manifold mounted exhaust cleaner

VV5Q5 $\frac{1}{5}$ -□□□-CD $\frac{1}{2}$ (D side mounting)
VV5Q5 $\frac{1}{5}$ -□□□-CU $\frac{1}{2}$ (U side mounting)

An adapter plate for exhaust cleaner mounting is provided on the top of the manifold end plate. The exhaust cleaner collects drainage and oil mist (99.9% or more) and is highly effective for noise reduction.
(Noise reduction of 35 dB(A) or more)

Applicable exhaust cleaners
AMC610-10 (Port size Rc 1), AMC810-14 (Port size Rc 1 1/2)

Note 1) Exhaust cleaner: AMC610-10 and AMC810-14 are not included. Please order it separately.
Note 2) Mount so that the exhaust cleaner is at the lower side.
Note 3) For details about the exhaust cleaner, refer to the **Web Catalog**.

Manifold Option Parts

Interface regulator (P, A, B port regulation)

ARBQ5000-00-□-1 (Plug-in type)
ARBQ5000-00-□-5 (Plug lead type)

By mounting a spacer regulator on the manifold block, it enables to regulate pressure per every valve.

Specifications

Interface regulator		ARBQ5000					
Regulating port		A		B		P	
Applicable valve		Plug-in	Plug lead	Plug-in	Plug lead	Plug-in	Plug lead
Maximum operating pressure		1.0 MPa					
Set pressure range		0.05 to 0.85 MPa					
Fluid		Air					
Ambient and fluid temperature		–5 to 60°C (No freezing)					
Port size for connection of pressure gauge		M5 x 0.8					
Weight [kg]		0.79	0.74	0.78	0.73	0.79	0.74
Effective area at supply side [mm²] S at P_1 = 0.7 MPa/P_2 = 0.5 MPa	P → A	33		75		29	
	P → B	64		33		28	
Effective area at exhaust side [mm²] S at P_2 = 0.5 MPa	A → EA	36		75		78	
	B → EB	68		38		69	

Note 1) Set the pressure within the operating pressure range of the valve.
Note 2) Operate an interface regulator only by applying pressure from the P port of the base, except when using it as a reverse pressure valve. When using it as a reverse pressure valve, P port regulation is not allowed to use.
Note 3) When using a perfect spacer, assemble a valve, a spacer regulator and a perfect spacer in this order to use it.
Note 4) When using in A port regulation, B port regulation by closed center, since there is a problem in its operation, please contact SMC.
Note 5) Dust-tight/Water-jet-proof (IP65) is not available with interface regulator.

Semi-standard Specifications

External Pilot Specifications

- When the supply pressure is:
  - lower than the minimum valve operating pressure of 0.1 to 0.2 MPa, or when it drops below this level,
  - used for reverse pressure (R port pressure) or cylinder pressure (A, B port pressure),
  - used for vacuum specification, it can be used for external pilot specification. Order a valve by adding the external pilot specification [R] to the part number. External pilot is available as standard for manifolds and options.
- Compatibility with universal porting is possible for the single, double and 3-position (excluding double check) types.

Pressure Specifications

Valve construction		Metal seal	Rubber seal
Operating pressure range		−100 kPa to 1.0 MPa	
External pilot pressure range	Single	0.1 to 1.0 MPa	0.2 to 1.0 MPa
	Double		0.15 to 1.0 MPa
	3-position	0.15 to 1.0 MPa	0.2 to 1.0 MPa

		② AXT632-25-11 (M4 x 66)	2		
	Valve + Double check spacer with + Individual SUP or residual pressure exhaust Individual EXH (Top) (Bottom)	① AXT632-25-7 (M4 x 146)	4	For manifold	
		② AXT632-66-2 (M4 x 96) Note 2)	2		
	Valve + Interface regulator + Double check spacer with (Top) residual pressure exhaust (Bottom)	① AXT632-25-14 (M4 x 178)	4	For manifold	
		② AXT632-66-3 (M4 x 128)	2		
	Valve + Interface regulator + Individual SUP, (Top) Individual EXH or Restrictor (Bottom)	① AXT632-25-7 (M4 x 146)	4	For manifold ∗ The individual EXH and throttle valve can be mounted on the top.	
		② AXT632-66-2 (M4 x 96)	2			Blanking + SUP stop + Individual plate valve SUP (Top) (Bottom)	① AXT632-25-5 (M4 x 82)	4	For manifold	
		② AXT632-25-11 (M4 x 66)	2		3	Valve + SUP stop valve (Top) + Individual SUP (Middle, Bottom) + Individual EXH (Middle, Bottom)	① AXT632-25-7 (M4 x 146)	4	For manifold	
		② AXT632-25-12 (M4 x 98)	2		
	Valve + Double check spacer with residual pressure exhaust (Top) + Individual SUP (Middle, Bottom) + Individual EXH (Middle, Bottom)	① AXT632-25-14 (M4 x 178)	4	For manifold	
		② AXT632-66-3 (M4 x 128) Note 2)	2		
	Valve + Spacer (Top): Interface regulator Spacer (Middle): "Individual SUP or Individual EXH"/"Restrictor" Spacer (Bottom): "Restrictor"/"Individual SUP or Individual EXH"	① AXT632-25-14 (M4 x 178)	4	For manifold ∗ The individual EXH and throttle valve can be mounted on the top.	
		② AXT632-66-3 (M4 x 128)	2		
Note 1) When the SUP stop valve and individual SUP are mounted, the stop valve is mounted on the top of the individual SUP.
Note 2) Proper tightening torque: 1 to 1.4 N·m

Specific Product Precautions 1

Be sure to read this before handling the products.
Refer to page 8 for safety instructions and pages 9 to 15 for 3/4/5 port solenoid valve precautions.

Continuous Duty

⚠Warning

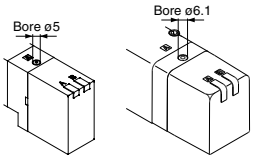
When the product is continuously energized for a long period of time (10 minutes or longer), select the low wattage type (DC specification). The AC type cannot be continuously energized for 10 minutes or longer. If anything is unclear, please contact SMC.

Manual Override

⚠Warning

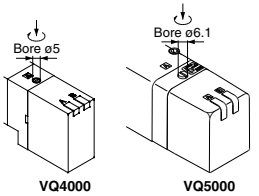
Since connected equipment will operate when the manual override is activated, confirm that conditions are safe prior to activation.

Push type (Tool required)

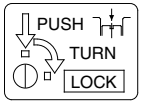


Push down the manual override button with a small screwdriver, etc., until it stops.
The manual override will return when released.

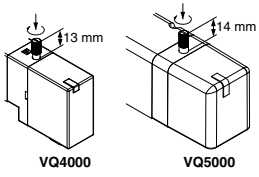
Locking type (Tool required)



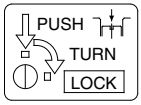
Push down the manual override button with a small flat head screwdriver until it stops, and turn it clockwise 90° to lock it. Turn it counterclockwise to release it.



Locking type (Manual)



Push down the manual override button with a small flat head screwdriver or with your fingers until it stops. Turn it clockwise by 90° to lock it. Turn it counterclockwise to release it.



⚠ Caution
Do not apply excessive torque when turning the locking type manual override. (0.1 N·m or less)

Valve Mounting

⚠Caution

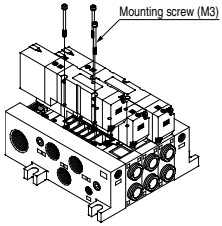
After confirming that the gasket is installed correctly, securely tighten the mounting screws according to the tightening torque shown below.

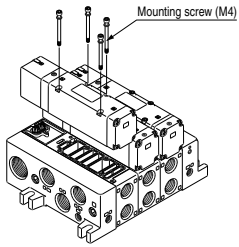
VQ4000

Proper tightening torque [N·m]
0.8 to 1.2

VQ5000

Proper tightening torque [N·m]
1 to 1.8

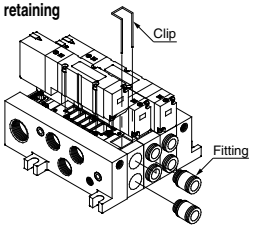




Replacement of One-touch Fittings/VQ4000

⚠Caution

Cylinder port fittings are available in cassette type and can be replaced easily. Fittings are secured with a retaining clip that is inserted from the top side of the valve. After removing the valve, remove the clip with a flat head screwdriver to replace the fittings. To mount a fitting, insert the fitting assembly until it stops and reinsert the retaining clip to its designated position.

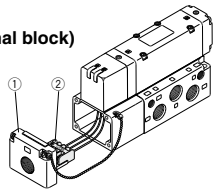


Lead Wire Connection

⚠Caution

Plug-in sub-plate (With terminal block)

- If the junction cover ① of the sub-plate is removed, you can see the plug-in type terminal block ② mounted inside the sub-plate.
- The terminal block is marked as follows. Connect wiring to each of the power supply terminals.



Model \ Terminal block marking	A	COM	B	$\bar{T}$
VQ$^{4}_{5}$10$^{0}_{1}$	A side	COM	—	—
VQ$^{4}_{5}$20$^{0}_{1}$	A side	COM	B side	—
VQ$^{4}_{5}$$^{3}_{6}0^{0}_{1}$	A side	COM	B side	—

Note 1) There is no polarity. It can also be used as –COM.
Note 2) The sub-plate is double wired even for the VQ$^{0}_{4}$10$^{0}_{1}$.

- Applicable terminal: 1.25-3s, 1.25Y-3, 1.25Y-3N, 1.25Y-3.5

VQ4000/5000 Series
Specific Product Precautions 2

Be sure to read this before handling the products.
Refer to page 8 for safety instructions and pages 9 to 15 for 3/4/5 port solenoid valve precautions.

Lead Wire Connection

⚠Caution

Plug lead: Grommet type

Make connections to each corresponding wire.

	Single solenoid	Double solenoid
Standard	Black: A side solenoid Red: COM	Black: A side solenoid Red: COM White: B side solenoid
IP65 enclosure	Black: A side solenoid Red: COM White: B side solenoid (Not used for single solenoid) Green: (Not used for single or double.)	

Note) There is no polarity. It can also be used as –COM.

Installation and Removal of Light Cover

⚠Caution

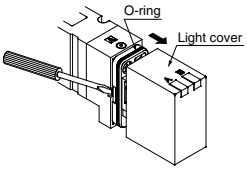
Installation/Removal of light cover (VQ4000)

• Removal

Open the cover by inserting a small flat head screwdriver into the slot on the side of the pilot assembly (see drawing below), lift the cover out about 1 mm and then pull off. If it is pulled off at an angle, the pilot valve may be damaged or the protective O-ring may be scratched.

• Installation

Place the cover straight over the pilot assembly so that the pilot valve is not touched,and push it until the cover hook locks without twisting the protective O-ring. (When pushed in, the hook opens and locks automatically.)



Installation and Removal of Light Cover

⚠Caution

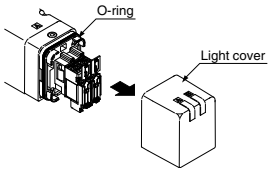
Installation/Removal of light cover (VQ5000)

• Removal

To remove the pilot cover pull it straight off. If it is pulled off at an angle, the pilot valve may be damaged or the protective O-ring may be scratched.

• Installation

Place the cover straight over the pilot assembly so that the pilot valve is not touched, and push it until the cover hook locks without twisting the protective O-ring. (When pushed in, the hook opens and locks automatically.)



Replacement of Pilot Valve

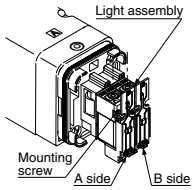
⚠Caution

• Removal

Remove the mounting screw that holds the pilot valve using a small screwdriver.

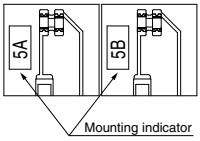
• Installation

After confirming the gasket is correctly placed under the valve, securely tighten the bolts with the proper torque shown in the table below.



Proper tightening torque [N·m]
0.1 to 0.13

Note) The light circuit boards: A side is red and the B side is green. It must be mounted on the pilot valve in accordance with the mounting indicators.



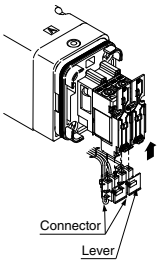
VQ4000/5000 Series
Specific Product Precautions 3

Be sure to read this before handling the products.
Refer to page 8 for safety instructions and pages 9 to 15 for 3/4/5 port solenoid valve precautions.

Plug Lead Type

Attaching and detaching connectors

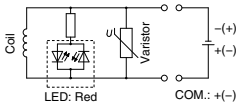
- To attach a connector, hold the lever and connector unit between your fingers and insert straight onto the pins of the solenoid valve so that the lever's pawl is pushed into the groove and locks.
- To detach a connector, remove the pawl from the groove by pushing the lever downward with your thumb, and pull the connector straight out.



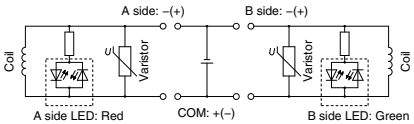
Note) Do not pull on the lead wires with excessive force. This can cause faulty and/or broken contacts.

Internal Wiring Specifications

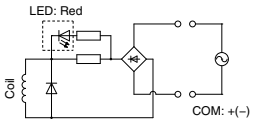
⚠Caution



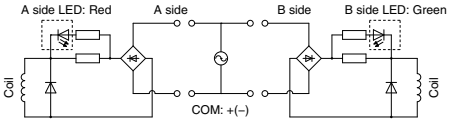
DC: Single



DC: Double



AC: Single



AC: Double

Note) For DC, coil surge voltage generated when OFF is about –60 V. Please contact SMC separately for further suppression of the coil surge voltage.

Enclosure IP65

⚠Caution

Wires, cables, connectors, etc. used for models conforming to IP65 should also have enclosures equivalent to or stricter rating than IP65.

How to Calculate the Flow Rate

For obtaining the flow rate, refer to the **Web Catalog**.
